(Rev. W. J. Rowan, Ph. D., Pastor)  
Sabbath Services:  
Sabbath School, 9:45 a. m.; Preaching, 11 a. m.; Praise and Song Service, 7:30 p. m.; Christian Endeavor, 6:45 to 8 p. m.; Wednesday evening Prayer-meeting, 8 o'clock. Teachers' and Officers' Meeting, 7:30 o'clock. A cordial invitation to all.

April 12—Inter-Society Debate Athenaeum and Delta Phi Societies.  
May 3—Annual Oratorical Contest in competition for W. C. T. U. Prizes. The prizes offered are \$35 and \$15 respectively.

### Suggestions For Council

#### WESTERN DISTRICT—

At the solicitation of his many friends, D. C. Rose has consented to allow his name to be used as candidate for Council from Western district. Should his district elect him, he will make a good councilman, as he has had a great deal of experience along practical lines of life.

#### MIDDLE DISTRICT—

Our Middle district could not do better than elect Dr. Walt H. Steele.

#### EASTERN DISTRICT—

The friends of J. B. Jacobs, who has so acceptably represented the Eastern district for the past two years, have at last obtained his consent to again be a candidate. Mr. Jacobs' health has of late not been of the best, hence the delay in giving his consent. His record in Council has been all to the good—may he return.

### Annual Inspection Of Company E

The annual inspection of Company E, First Infantry Organized Militia of Delaware, stationed at Newark, was made last night, by Lieut. Lynch, 29th Infantry U. S. A., assisted by Major Doherty, of Militia of Delaware. The Company was in fine form, and everybody came up to the qualifications.

Company E is one of the crack companies of the State. It has the credit of being the company of expert marksmen. Much credit is due Capt. Jacobs and other officers for its present condition.

### The Old Gods In A New Guise

Everybody is cordially invited to hear the lecture by Professor Carlton F. Brown, of Bryn Mawr College, on "The Old Gods in A New Guise," Delaware College Oratory, April 11, 8 p. m.

## Around Town

"Hello, Bill." Are you an Elk? It matters little what you say or think about me. But what I say and think of myself is a vital question. Never was a prayer meeting so quiet as was the Council meeting, when the Russell engine man got up to make his speech. It was painful. It was—You first, Gaston.

"I'll fight it out on this line if it takes all summer." H. M. Campbell covered himself with glory by ordering the sprinkler on. He says it is going to be kept going until something is done. For Sale—Little Dear Power and Light Company. Special inducements to towns.

"I'll bet you an Overland to a wheelbarrow that the POST is settled."

"The Boosters feel better, live better and fight better than any other tribe on earth."

The Postoffice Department, after looking over the POST, says it is second-class matter, all right.

## PERSONAL

Mrs. Lovett and daughter, Sarah, have returned from New London, where they have been visiting the Misses Woodward.  
Miss Davis, of Wilmington, visited her aunt, Miss Springer, over Sunday.  
Miss Susie Eubanks has returned from a visit in Oxford, Pa.  
Miss Lillie Steele visited Mrs. H. M. Campbell over Sunday.

Elder Eubanks left Sunday afternoon for a trip through Georgia. Miss Laura Campbell, of Wilmington, visited friends in Newark, on Sunday.  
Mrs. Homewood is visiting her daughter, Mrs. Ewing, at Kelson, Pa.  
Mrs. Lee Elliott is visiting her mother, Mrs. Willis, at Chesapeake City, this week.

Mrs. Jones, Steele and Kilgore called on Milton friends this week.  
Mrs. Bryan and Mrs. McMillin were in Wilmington visitors this week.  
Miss Bessie Clark, of Philadelphia, has been spending some time with her parents, on Wilkins Terrace.

Mrs. G. Harold Powell and children, have been visiting her sister, Mrs. Lee Cooch, at Cooch's Bridge. Prof. Powell spent Sunday with them.  
Miss Essie Ferguson has been appointed to take the census of the town of Newark. She will begin the work April 15th.

Albert Rhoades, of St. Paul's School, Baltimore, has been spending his spring vacation with his mother, Mrs. Ruth Rhoades.  
Miss Agnes Medill spent Saturday and Sunday with New Castle friends.  
Miss Beulah Thompson is visiting her sister, Mrs. John Pilling.

Miss Anna Glenn, of Zantcham, was the guest of Mrs. Wm. Heavels, on Sunday.  
Miss Ethel Campbell has been visiting friends in Wilmington.

James Rylaud Clarke, of New York City, is spending the week with friends.

## Teachers' Local Institute

The last local Institute for the current school year met on Saturday in the Y. M. C. A. Building, Wilmington, with 125 teachers in attendance.

After prayer by Rev. Mr. Poole, of McCabe Memorial Church, Superintendent Spaid introduced Miss Pierce of the West Chester Normal School, who gave two practical and instructive addresses upon modern methods of teaching, primary reading. Many teachers expressed regret that these addresses were not heard by parents and members of school boards, throughout the county.

Superintendent Spaid's announcement that the State Board of Education had decided that teachers should receive payment for each day spent in attending the local, as well as annual institutes, came as an agreeable surprise.

Superintendent Spaid expressed himself as gratified by the large number of teachers and the interest shown, at all the meetings.  
The teachers are very grateful to the superintendent for the fine series of institutes which he has held, and for his untiring efforts, in spite of all obstacles, to uplift the public schools of the county and State.

## A Pretty Home Wedding

Miss Lavina Davis, daughter of Mr. and Mrs. Nathan Davis, of Newark, was married on Wednesday evening, March 30, to Mr. Elbert Burns, of Landenberg, Pa.  
Miss Clara Bolton was bridesmaid and Mr. John Bidelle best man.  
The Rev. George T. Alderson performed the ceremony. It was a pretty, quiet home wedding, only the near relatives being present.  
Miss Frances Hamilton, of Edge Moor played the wedding march.  
After the ceremony, dainty refreshments were served. The bride received some very pretty and useful presents.  
Mr. and Mrs. Burns will reside near Landenberg, Pa.

Luxury for Newark—will arrive in a few days

## Medical Inspection In The Schools

### Address By Prof. Messersmith Before New Century Club

(Continued from last week.)

**EARS**—The ears are examined for acuteness of audition. There are many simple tests by which the acuity may be determined. The ears are also examined for irritating discharges, or other affections which may lead to dullness of hearing.

The examination made, the parents are notified if there is a defect, and they are told its specific nature. If the parents do not attend to its correction, it is the custom of the school authorities in many cities and towns to provide adequate treatment. This treatment in many cases brings about improvement in the hearing, but if its acuity has been permanently impaired, the pupil must be so placed in the school room that he may hear the teacher's voice. For the deaf, as for the blind, the States already support special schools, and there are excellent private pay and philanthropic institutions.

**NOSE**—Catarrh and adenoid growths are the two most important from the school's point of view. Catarrh is easily detected and it is within the province of the school to advise the pupil and his parents regarding its treatment.

Adenoid growths are one of the most serious and most common causes of retardation. Adenoids are an enlarged and hypertrophied state of lymphatic glands in the naso-pharynx. They hinder breathing, cause sleeplessness and dreams, and in some yet unexplained way retard the pupil's mental development. The physical stigmata are a husky voice, contracted chest, sleeplessness and dreams, sleeping with mouth open, and breathing generally through the mouth, seeming dullness and listlessness, and slow progress in school. The stigmata however, vary and the one sure sign is mouth breathing. The adenoids must be removed or in almost every case there is serious retardation of the mental development. This removal is a comparatively simple operation, and it is in most cases the best way to rid the child of them. In the cases of children over 12 years of age, the operation is more difficult, though not dangerous. It is essential, therefore, that they be detected as early as possible and be removed. It has been found difficult to show parents the necessity of removing these growths.

## Vestrymen Of St. Thomas Church Elected

At a meeting of the congregation of St. Thomas Church, on Easter Monday night, the following gentlemen were elected members for the vestry for ensuing year:  
Mr. Alfred A. Curtis, Dr. George A. Harter, Hon. David C. Rose, Dr. A. Lee Porter, Dr. Charles F. Dawson, Mr. Harlan A. Curtis, Mr. D. Lee Rose, Dr. Arthur S. Honchin, Mr. Robert Coverdale.

Mr. Alfred A. Curtis and Dr. George A. Harter were made Senior and Junior Wardens, respectively. Dr. Charles F. Dawson was elected Secretary of the Vestry. Mr. Alfred A. Curtis and Dr. George A. Harter were elected delegates and Hon. David C. Rose and Dr. Charles F. Dawson were elected Alternates to the Diocesan Convention to be held in St. Phillips' Church, Laurel, on Wednesday, June 1.

## Candidates For Council

The candidates so far announced for council-election to be held April 12th, are David C. Rose and Joseph Thimas of the western district, and L. B. Jacobs, of Eastern district.

No announcements have been made from middle district. Dr. Walt H. Steele is prominently spoken of. It is not yet known whether Doctor will permit his name to be used.

## Newark High School Wins

Our High School boys defeated Elkton High School on Saturday afternoon by a score of 8 to 6. The Newark batters were herdman, Lovett and Wats.  
This was the first game of the season. Best wishes for Newark.

## NEWS

### Here and There

Hon. L. Irving Handy will deliver his lecture, "Did He Die and Live Again?" at Smyrna, in the near future.

Friends of J. Rankin Armstrong were glad to see him back from his trip to Colorado Springs.

Hon. D. C. Rose and wife have returned from Florida. Mr. Rose writes very interestingly of Florida.

Daniel Stoll starts this week on a plumbing contract on Depot road.

George H. Johnson visited the Order of Elks in Wilmington, on Monday night.

George Clark purchased a fine motor car on Saturday at Klairs Bazaar.

Wm. Gambie has added a new porch to his residence on Main street.

Mr. Ewins, of the College, has been appointed pastor of M. E. Church, at Newport.

Farmers are doing good work now. The rain on Sunday night was much needed.

The Newark Grange will meet with the College Agricultural Club, on Monday evening, April 12. An interesting meeting is expected.

Don't get the lecture on Monday night, at the College.

Miss Helen Keithley, who recently moved here from Cherry Hill won the set of dishes given away by P. M. Sherwood on the clock contest. It seems, according to the checks, that had others been there that some one might have carried home a fine set of dishes. It is a novel piece of advertising in the respect that you get the worth of your money, anyway, and a possibility of a new dinner set. Everybody's game that deals at Sherwood's.

## Dust, Oil Or Water

There was quite a discussion at the meeting of the Council on Monday evening—whether we should use oil or water on the streets.

Mr. Pyle strongly advocated oil. He had made a canvass of the business men on Main street and found many willing to subscribe. Others seemed in favor of oil until Mr. Theodore Armstrong spoke of his observations.

Mr. Armstrong has traveled much, and spent a great deal of time at one of the select resorts. He said he had never seen it work successfully in towns. For country roads he said he would strongly advocate the use of oil. But in a town where the houses are so close to the street, he thought Newark would make a great mistake.

The objections to the oil are—the unpleasant odor, tracking of dirt in houses and after it has worn, the greasy dust will begin to fly, and getting into houses injuring carpets, furniture and face curtains. And another strong objection is the heat. During extreme hot weather, the heat is more oppressive where oil is used.

The only objections to water, have we the supply?  
The advantages are cleanliness and it is refreshing.

Yesterday, in consulting forty residents—thirty-one were in favor of water, seven in favor of oil, and two said, "Anything but dust."

## Regular Meeting Of Council

The Council met Monday evening in regular monthly meeting.

Business transacted—payments of bills authorized.  
Representative of Russell engine was present and made a few remarks and said he found the engine to be working perfectly. The only requirements were a few adjustments to be made, necessary to any engine.

Mr. Leak and Mr. Kennedy said the engine was in good shape and if it so continued for one month it was decided by motion made by Mr. Kennedy to pay balance due.

New town police goes on duty April 7th.

It was decided to open bids for work to be done to supply town water on Prospect avenue.

A lengthy discussion was held on the oil question. It was decided to look into the cost of same, and make inquiries of its success in other towns.

## Marriages

On Tuesday, March 28, at White Clay Creek Manse by the Rev. J. W. Lowden, Mr. Andrew J. Landell, of Stanton, and Miss Mary Snitchee, of Marshallton, Del.

On Wednesday, March 30, at White Clay Creek Manse, by the Rev. J. W. Lowden, Mr. George T. Hobson, Jr., of Cecil county, Md., to Miss Nellie M. Pierce, of Marshallton, Del.

## New Century Club

Mrs. Armstrong read a most interesting paper on Monday last. Her subject was, "The First Decade of the Twentieth Century."

A business meeting was held, at which several club matters were discussed. Mrs. Hayward, chairman of Program Committee, presented to the Club an outline of next year's program.

Club Correspondent.

## Mr. Rose Talks of Florida

Newark, Del., April 6th, 1910.  
Editor NEWARK POST:

As per your request, I will give you some of the interesting points of my trip South. We left Newark February 28th, and arrived in Jacksonville, Florida, on the 21st. We only expected to remain there for a day or two, but noting the rapid growth of that city since my last visit, of one year ago, we decided to stay longer and remained there two weeks.

Now, I think Jacksonville is the metropolis of the South, the gateway for all persons going to any point in the State of Florida, all railroads branching out to both east and west coast from that point. I found the city one of business hustle—everything on the move. They have a Board of Trade of seven hundred members, who pay \$30 each dues per year, giving them \$21,000 to advertise the city from that body. Each member thinks the life of the city rests on his shoulders.

So Jacksonville is a center for the growth of the city. They own their own building on Main street, valued at about \$75,000. In this building they show manufactured goods made in the city. Free admission.

Land values have increased rapidly. Taking a drive with a business man up Riverside, one of the beautiful residential sections, he showed me building lots for about one mile mostly all built up with fine homes. The lots sold in 1902 for \$25 each. They now sell for \$12,000. A corner property at Main and Forsyth streets, sold in 1902 for \$16,000. This property sold during my stay for \$140,000.

The city has good electric car service. You can ride for ten miles for one fare of five cents. The principal streets are paved. They have a good paid fire department. At the alarm of fire the chief leads in his automobile at a rate of fifty miles an hour, sounding alarm and clearing the streets for the engines who follow in dead run in his wake. I saw one run while here.

Now, I wish to say a word for the benefit of the colored race in our town. You have often heard of the poor colored man of the South. Now I wish you could just go to Jacksonville and see. There you will find the most prosperous and industrious colored population in this country. Most all mechanics, carpenters, painters, masons, plasterers are colored men, doing good mechanical work, contented and prosperous. Many of them own their own homes, and several fine churches. One church—colored Baptist—is a beauty costing at least \$100,000, and several others. They have fine department stores—much better than our city of Wilmington, with her 60,000 population against Jacksonville's 55,000. One firm has just purchased a full square for a store in the best part of the city, and is going to build a store as fine and large as the Wanamaker store in Philadelphia.

Jacksonville is not a dry city, having over 100 saloons, each paying \$1500 license, the city getting one-third or \$50,000, the county one-third and State one-third.

About one-third of the white population are northern persons.

From Jacksonville we took a river trip up the St. John's river to Panama. This is not a very fine city. (They are dry.) A large hotel covering an entire square, is closed. No good place for the tourist to stop. From this point we took the trip up the Ocklawaha river for 100 miles to the great Silver Springs on the steamer Hiawatha. This is one of the most romantic rivers in the world. Through the cypress swamp for a hundred miles, many places so narrow that the trees strike each side of the boat. You see alligators in their wild state from six inches to fourteen feet long. Silver Springs, the terminus of the boat line, is a clear spring of water from twenty to one hundred feet deep. At sixty-five feet you can see to read the inscription of a coin. From here we went to Ocala, the county seat of Marion County. This is quite a city. In this locality, I think they have the best quality of farming land in the State, growing grain about 30 bushels of corn per acre. They have a State farm worked by convict labor, located near the city, also a large lumber mill run by convict labor, sending the convicts out for miles in the woods to work. Sometimes they escape. Two left while I was there, one of them a life prisoner.

We now moved on to Tampa. This is a city of about 200,000 inhabitants. The main industry—cigar factories, there being 250 of them. The employees are mostly Spanish and Cubans.

We took a trip up the Manatee River, one of the orange and grape fruit districts. One grove of 250 acres of grape fruit, owned by one company. Also quite a lot of celery is grown on this river. We stopped on our return trip at Sanford, the great celery district. This is an interesting sight to see—these large plantations of celery. Land sells for \$3,000 per acre. It seems high, but one grower told me he had sold from one acre 100 cases at the station, for \$1.50 per crate, making about \$2,000. Deducting cost of fertilizer, and labor, \$600, the price is not so high. From here we started on our home trip, stopping at Savannah.

Club Correspondent.

# THE NEWARK POST

Published every Wednesday at Newark, Delaware.

EVERETT C. JOHNSON

Entered as second-class matter March 16, 1910, at the postoffice at Newark, Del., under the Act of March 3, 1879.

Address all communications to THE NEWARK POST. Make all checks to THE NEWARK POST. We want and invite communications, but they must be signed by the writer's name—not for publication, but for our information and protection.

The subscription price of this paper is \$1.00 per year, in advance.

WEDNESDAY, APRIL 6, 1910

## FRIENDSHIP

A ruddy drop of manly blood  
The surging sea outweights;  
The world uncertain comes and goes,  
The lover rooted stays.  
I fancied he was fled,  
And, after many a year,  
Glowed unexhausted kindness  
Like daily sunrise there.  
My careful heart was free again—  
O friend, my bosom said,  
Through thee alone the sky is arched,  
Through thee the rose is red,  
All things through thee take nobler form  
And look toward the earth,  
The well-round of our fate appears—  
A sun-path in thy worth.  
Me too thy nobleness has taught  
To master my despair;  
The fountains of my hidden life  
Are through thy friendship fair.  
—Emerson.

"LET my friend bring me a message, a thought, a sincerity, a glance, —not news nor poetry. I can get chat and politics from cheaper companions."

OUR advertisers have crowded us this week. We hope to remedy this next issue.

Watch for the paper next week. BECAUSE of the demand on our space by advertisers this week, we are compelled to omit the Sunday School Lesson in this number of the POST.

## The Black Knot Of Plums And Cherries

An appeal to those interested in fruit trees.

The black knot is one of the most unsightly diseases of the plum and cherry. It causes great loss annually, and yet very little is done to prevent the unnecessary waste. Years ago, this disease was believed to be caused by insects, or by improper soil conditions. To-day it is proven beyond doubt that this trouble is caused by a fungus parasite known as (*Plowrightia morbosus*).

The term black knot is very significant. The affected parts swell, and present the form of the well known black knots. Young infections are manifested as swellings which increase in size until the bark is ruptured. A granular growth soon fills the crevice. This newly formed knot is light yellowish to brown which turns black as the season advances. The black knot is a twig disease. Any part of the limbs of the tree may be infected. The knots are formed in the crotches of young and old branches, on young twigs or old limbs; and also on small spurs which bear fruits. It is remarkable that for the most part the knots do not encircle the whole twig. They are formed on one side of the limb, and thus, nourishment is sent up to the higher parts of the infected twig. Young spurs, however, are killed outright.

If this disease should be confined to an individual infected tree only, the danger would not be so great. However, this is a contagious malady. During May and June, if we closely examine diseased twigs we will find that the knots are covered with a velvety coating. This coat consists of great masses of summer spores of the fungus. These spores are extremely light and may be carried to considerable distances by the lightest breeze, and when they are lodged on healthy twigs of plums or cherries, the disease is newly induced. Late in the winter if we again examine these knots we will find them covered with minute pimples. These are microscopic sac-like bodies which contain the winter resting spores. The latter are of a nature such which enables them to withstand the rigors of the winter. Early in the spring these winter spores are discharged and are carried by the wind to infect healthy twigs. The black knot fungus lives several years on the same affected limb, and it is capable every year to produce large crops of summer and winter spores. The fungus rabs the tree of the food which was destined for the nourishment of the limbs and leaves. The result is a weakening condition of the tree, which in turn results in a poor harvest of fruit. Finally the continuous injury inflicted ends in the death of the tree. The black knot attacks the cultivated as well as the wild plums and cherries. Many a neglected cherry tree growing in some corner in the farm is found to be affected. Such trees serve as sources of infection. The question arises, how can we get rid of this trouble? We cannot em-

phasize too strongly that there is no cure known, but it can be prevented. Now is the time, while the twigs are still bare, to cut out all the knots. In this time of the year the knots cannot fail to attract the attention of even the least observant eye. Be sure to always cut four to five inches below the knot, for any trace of the fungus left in the branch will continue to grow and produce a new knot. Badly affected trees should be cut out all together. Such material, if it is understood, should be consigned to the fire. It is important, not only for any one individual to take these steps in controlling the disease, but it is as important for your neighbor to do likewise. If he is unwilling to do so, impress the Legislature of this State with the importance of passing a law to that effect.  
J. T. J.

Fifty Six years of uninterrupted good service to the farmers. We also sell Scott's and other makes. Orders are coming in good. Buyers appreciate the great advantage of being able to haul out of our warehouse just when it suits them. No waiting or loss on account of cars not coming.

## RECLEANNED SEED OATS AND CHOICE CLOVER SEED

Our prices on 100 lb. sacked Bran, Hammond Dairy Food and Ceresota Flour are lower than prevailing prices.

Let us figure with you—you will find it worth while.

## EDW. L. RICHARDS.

### Fly Bulletin

Are you doing anything to make the world better for your living lived in it?

God bless the man who first invented screens. The device that has at once brought the greatest degree of personal comfort, cleanliness of household and individual safety is the door and window screen. No other invention of the last quarter of a century can compare with its worth and utility as a life and health saver, and yet, until recently, screens were used principally to exclude the fly and mosquito solely on the ground of personal comfort.

Heads of families who are looking for an investment may be assured of one that is certain of enormous returns through the prevention of sickness and maybe death by the early and effective screening of every outside door and window of their home. It is much easier to keep flies out by proper screening than to get them out once they get in. Screen your house! Scientists of all countries are agreed on one point—that the fly is carrier of disease germs—therefore, screen your house!

Flies love to feast on filth, and then get into the house and wipe their feet on your cake or baby's bottle. Screen the house! It is true they are nature's scavengers, but they spread filth and very often disease in doing their work: besides it is better to do your own scavenging by keeping clean than to have the fly do it for you; for not only is the fly a dangerous companion, but clean people are beginning to suspect that those who have flies about them are dirty housekeepers, else flies would not be there. It, therefore, you wish to bear the reputation of cleanliness in your neighborhood, be sure that your trash and manure heaps are frequently removed, and that your house is properly screened!

(Extract from Kansas State Board of Health Bulletin.)

Quality considered you get the best screen goods for your money at THE DEAN CASH STORE.

### April Fool

She had been thinking of the fact for some time, and had tried a bit. Being interested in a study, the celebration of April Fool's Day appealed to her.

Last week she saw the General's proclamation in THE POST, reviewed her speech, selected more quotations and felt well prepared.

Shortly after recess she thought would make her pretty speech to the scholars. The day was beautiful, children attentive, eager to hear what more incentive could she give.

"Now children, I am going to tell you about the day we celebrate, April Fool's Day."

"Now, before I begin, who can me what day we celebrate tomorrow?"

"Only one scholar knew and answered—"April Fool's Day!"

And thus another speech was to history.

## Mr. Rose Talks of Florida

(Continued from Page 1.)

Georgia, Charlestown, S. C., and Fayetteville, N. C.—then on to Richmond for five days.

This is a fine old city, with many places of historical interest to visit. The home of Jefferson Davis, President of the Southern Confederacy, is now used as a museum. His tomb is in Hollywood Cemetery, a beautiful place. Also the Oakwood Cemetery where 10,000 Confederate soldiers are buried in one large plot. The old Historical Church, St. Johns, where Patrick Henry attended, with his pew still marked, is an interesting point for the lover of history. City Hall and Capitol buildings are other places of note.

Other places worthy of note are the Battle ground of Seven Pines, Confederate Soldiers' Home, Masonic Home and Washington's headquarters—the old building standing in its original site.

One word more, and I think you will take about all the space you have for me! They are booming Florida for all there is in it. Each town of any size has a live Board of Trade, and they spare no expense to get people to locate there. One place about half-way from Tampa to Sanford—a new town, was started last September with one house. Now they have a population of 1500, almost as large as Newark in seven months. The place is called St. Cloud.

DAVID C. ROSE

### Glimpses of Bird-Life

Field Sparrow (Spizella pusilla). Length, 5 and 7-10 inches. Above reddish-brown, slightly mixed with black; beneath, grayish white; bill, brown; two white bars on wings. Cardinal (Cardinalis cardinalis). Length 9 inches. Color red, excepting throat, which is black; a large crest. Female with olive brown predominating.

Sunday, March 27th. We are in the woods on a quiet slope, keeping as quiet as possible, and the birds are all around us. The most prominent voice is the Flicker; Phoebe is close by, the Tufted Titmouse is in the tree tops, Nuthatch and Downy Woodpeckers are on the trunks. We are watching for another member of the Flycatcher family—the Wood Pewee. It is most time for him to arrive. Just outside of the woods we can hear meadow-larks, Robins and Song Sparrows, and clear above the songs of these birds is the voice of another sparrow that we think a great deal of—both as a bird and as a member of the orchestra; this is the Field Sparrow—a new arrival this past week. In size they are between the Song and Chipping Sparrows, shaped more like the latter. The song begins with a note rapidly repeated, continuing with a rising inflection, and getting faster to the rather abrupt end. It is pitched high and can be heard for quite a distance. It has the effect of a merry, tuneful laugh. They build their nests in the fields, among the dry grass and weeds, or in the low bushes, the eggs are small and speckled—from three to five in number.

But listen! The song of the Cardinal—the first we have heard this year. Is there another bird, throughout his range, that is admired and loved as much as the Cardinal? His appearance alone is a symphony; but when he sings, you feel that Nature must love you if she lets you hear such music as that. It is so sweet, so varied, and so human. Thousands of pages have been written about the Cardinal and still there is room for 25 many more. Have you read the "Kentucky Cardinal" by James Lane Allen? Well, read it! Or better still, "The Song of the Cardinal" by Porter. This is the story of an old man and his wife who had the "redbirds" for neighbors, telling all about the courtship, marriage and family of an unusually handsome Cardinal and his modestly dressed mate. We cannot think of a more fitting tribute than to paraphrase one of Riley's poems—

"When God made the Cardinal He didn't do nothing else that day, But jes' around and feel good."

George and Lucie Hamilton.

### In The Days Of The Comet

Now that the visitor of space in the heavens is a splendid test for good vision, can you see it? Can you pick out Halley's Comet from the dark dome of night? If not, your eyes are not normal. There is darkness there, and we assure you that that darkness is not a thing to be made light of. Come to us, get proper glasses before your eyes are strained too much. We can relieve that partial darkness.

# Announcement

Commencing May 1st, this Company will issue a paper of its own to be called "The Trust Company News." It will be issued every two months. Its columns will be devoted almost exclusively to banking news. Through it we propose to tell the public What a Trust Co. Is—What It Does and How It Will Help You.

This paper will prove to be something unique in the banking field.

The reading matter which it will contain will be for the most part entirely original as the paper will be edited by the management.

We know of no other bank or Trust Company in the state of Delaware that issues a paper of its own and we believe that we can lay just claim as to being the pioneer in this respect.

Do not miss the first issue. The paper is free for the asking, and we will forward you every issue if you so desire. Ask to be placed on our mailing list.

## THE GENERAL STORE OF NEWARK

I believe in buying everything I can at home—quality and price considered.

That is the reason I buy and sell BRADFORD'S Paints. Newark people should use BRADFORD'S Paints and Oils.

### WHY?

1st—They are as good or better than other paints.  
2d—They are cheaper.  
3rd—They are a home production. See me before you buy. Also a full line of oils, varnishes and brushes.

### ROOFING

Carry a full line of roofing materials. I recommend especially AMATITE, RAIN COAT AND REGAL.

This REGAL is a new roofing. I have secured the Agency for this vicinity.

I think it is going to prove one of the best roofings on the market for the money.

Stop in and see it

### HARNESS

Look up and see what you are going to need in the way of harness this spring.

I am just getting in a lot of harness and collars.

H. M. Campbell

## LIVERY

I AM HERE TO STAY

I have made arrangements to remain at the Deer Park stables. I have sold my store and intend to devote all my attention to my Livery work. You can hire the finest turnout here at a price within reason.

Coaches for Funerals and Weddings

Best Cab service for Dances.

Best Depot Hack service.

Call us by Phone.

Also prepared to do moving and heavy hauling. Prices reasonable.

ALFRED STILTZ.

Phone 29 D. Orders for building sand attended to.

## EXTRA MERCHANT TAILOR Ladies and Gentlemen

I am prepared to do tailoring work at the best grade. Drop in and see my samples. Suits from \$16.50 to \$35. Fit guaranteed or money refunded. You are to judge the fit. I can make you up a suit as good and for the less money that you can get in the cities.

### TRY ME

I also do scouring, dyeing and pressing. I want every man who wears tailor made clothes to come see me. I spend the money I get in Newark. Do you?

Give me a trial.

SAMUEL MILLER

Next Door To National Bank

### Powell's Restaurant

Just a word about what we are doing.

### OUR RESTAURANT

The business has increased the past year more than ten fold! Of course there is a reason for this. And we believe it is because of our service and the way of getting you a meal in a short time at a reasonable price.

### OYSTERS

Owing to the fact that we have contracted for a lot of Tangier Cove Oysters, we are able to sell them at 35 cents a quart.

### OUR CREAM

Everyone knows what that is. We are prepared to furnish any amount you wish.

\$1 Per Year

# OVERLAND IS THE CAR

A 40 h. p. Overland with 112-inch wheel base. Price with single rumble seat, \$1,250—double rumble seat, \$1,275—with 5 passenger Touring or Close-Coupled body, \$1,400

### The Reason

The car is amazingly simple. Three of the models operate by pedal control. Push a pedal forward to go ahead, and backward to reverse. Push another pedal forward to get on high speed. It is as simple as walking. A 10-year-old child can master the car in ten minutes.

The Overland has less parts than any other highgrade car. One invention alone does away with 47 pieces. The car is almost trouble-proof.

OVERLAND "Model 38" is the first real car for \$1000. Built by the same expert mechanics who made famous the costly Pope-Toledo cars. It is the only car at the price that gives plenty of room everywhere; that is really comfortable either on long or short rides or country tours; it is the easiest car in the world to drive—barring none; and it will stand up and give absolutely perfect service under conditions which none except the most expensive and carefully constructed cars will endure.

Like all our Planetary Models, the well known Overland Motto applies—"Only pedals to push and no noise but the wind."

### The Reason

The Overlands' supremacy—wherever known—is due to the following reasons;

The Overland engine is a wonderful creation. It is so automatic, so silent and powerful, so free from the usual troubles, that it appeals to the average buyer.

The OVERLAND stands the test.

There may be stronger and more serviceable cars than this—but no one around here knows which one it is.

Look for the "Story of an Overland" in next weeks issue.

Overland Model 38—Price \$1,000. 25 h. p.—102-inch wheel base. With single rumble seat, \$1,050—double rumble seat, \$1,075—complete Toy Tonneau, \$1,100

All prices include Magneto and Full Lamp Equipments.

A. F. FADER,

Newark, Del.
