## 'FRANK'S PLACE' RAIDED BY SIX OFFICERS FROM BALTIMORE

### Swooped Down on Bootlegger's Joint Late Last Thursday Afternoon, Arresting Frank Thrlor, Owner

RELEASED ON \$200.00 BOND

Six prohibition agents from headquarters in Baltimore raided Frank Thrlor's place—known as Frank's Place—at the corner of Appleton Cross Roads, about three miles west of Newark, about 4.30 o'clock Thursday afternoon, using axes to break up part of the equipment, and destroying several tubs of mash.

There were a number of complaints about this place continuously, mainly due, we understand, to his selling intoxicating beverages to minors, both girls and boys.

Thrlor was arrested and taken to Baltimore and given a hearing on Friday. He was released by a U. S. Commissioner on a \$200.00 bond. We understand that he was back and doing business on Saturday night.

One of the high-lights of the raid was two Newark boys who went out presumably to buy beer or some other beverage, but when they stepped inside one of the Federal officers was in back of the counter and asked them what they wanted; they evidently changed their minds for they asked for a bottle of pop.

DR. J. R. DOWNES ADDRESSES NEWARK LIONS CLUB

Dr. John R. Downes addressed the members of the Lions Club at their meeting Tuesday night. He spoke about the work he is now engaged in since giving up his regular practice, that of the public health center physician.

DR. MUSSELMAN TO VACATION IN POCONOS

Dr. P. K. Musselman is leaving on Saturday for a week's stay in the Poconos with Mrs. Musselman and their daughter, Barbara. During the coming week Dr. Musselman's office will be closed.

Elected Historian of American Legion

IRA S. BRINSER

Mr. Ira S. Brinser, Superintendent of the Newark Schools, was elected for the third consecutive time, Historian of the American Legion at the State Convention held in the Hotel du Pont-Biltmore, Friday and Saturday of last week.

Mrs. Conrad Lewis was elected First Vice-President of the Legion Auxiliary, and Mrs. Orville Little was among the alternates named to the National Convention.

## 5 KIDDIES VICTIMS AS GANG'S BULLETS MISS MARKED MAN

### Machine Gun Fire Mows Down Children at Play

The above is part of a heading appearing in a Tuesday's morning newspaper concerning New York Gunmen.

## Gunmen Invade Newark

A rumor was current on Monday and Tuesday to the effect that ten or twelve gangsters had invaded Newark, Del., and vicinity to hand out punishment to the guilty party or parties who stole a still near Newark, supposedly owned by a former Philadelphia gangster and racketeer.

The story was to the effect that the still was unloaded in a woods near Newark and before the owner could set it up for operation, it was stolen and local bootleggers blamed. A telephone call to Philadelphia is supposed to have brought the gunmen post haste.

## FOUR SUPPOSED GUNMEN CAPTURED BY OFFICER MANN

### Bears Out Rumor Current in Newark First of the Week; Caught in Lane of Harry "Polly" Malin.

The arrest last night by Officer Mann of four men loitering in Harry Malin's lane seems to justify the above rumor which was current in Newark the early part of the week.

While Officer Mann was cruising around town last night he noticed two men walking down South Academy street carrying a gasoline can, and upon reaching the entrance to Malin's lane he noticed a car parked without any lights. Two men jumped out and coming up to the officer asked where Harry was. Officer Mann said he wasn't with him. Evidently the two men, due to the darkness, did not notice the officer's uniform, for they were still there when Mann returned from Malin's house, where he went trying to locate Malin.

On searching the car of the two men he found a shot gun and a revolver fully loaded, ready for action. He immediately placed them under arrest and when the other two men carrying the gasoline can returned to the car they were also placed under arrest.

It is understood that while these men were looking for Malin he had given them the slip and had gone to a woods near Iron Hill where he acquired their still. After one of the four talked and told Officer Mann the location of the still, he immediately got in touch with Sheriff Buckworth in Elkton, and he and his deputy raided what was left of the still, destroying several hundred gallons of mash. The men will be turned over to the Maryland authorities.

THIS CLIMAX SHOULD STIR EVERY CITIZEN, WET OR DRY, TO RID NEWARK OF THIS TYPE OF CITIZEN BEFORE OUR "KIDDIES" ARE MOWED DOWN IN A GANG WAR.

## NEW CANNING INDUSTRY EMPLOYING SIXTY PEOPLE OPERATING NEAR NEWARK

### Claude P. Hearn Canning Own Vegetables in Privately Owned Sanitary Cannery; Only Cannery of this Character in this Section of the Country

Mr. Claude P. Hearn, owner and manager of the Blue Hen Farm, near Newark, has installed a cannery on his farm, under the able supervision of Mr. Norris Taylor, who has had twenty years' experience in the canning business, for the sole purpose of canning vegetables grown on his own farms. This is a new way of privately handling and marketing vegetables in this section. Naturally, only the prime vegetables are canned, giving them a flavor seldom found in commercially canned products.

The cannery is sanitary in every particular and all employees wear white uniforms, laundered daily, and furnished by Mr. Hearn. Mist of the pack is being canned in large cans, suitable for institutions and hotel trade. Beets and stringless beans have already been canned and will be followed by tomatoes and corn.

There are now employed about sixty men and women, all local white people; this number is to be increased, if necessary, in order to handle the vegetables while in their prime.

Mr. Hearn is to be congratulated on deciding on this way of marketing his vegetables. It has and will mean considerable to Newark, giving employment to a number of people for several months.

Private Canning Plant of Claude P. Hearn

## DR. A. J. MAVROMATIS OF DELAWARE HOSPITAL STAFF TO LOCATE IN NEWARK

### To Reside and Have His Office at South College Avenue and Kent Way

#### EXPECTS TO LOCATE HERE AUGUST FIRST

#### Newark's New Physician

A. J. MAVROMATIS

Dr. A. J. Mavromatis, who has served two years at Delaware Hospital, his first year as interne and second as chief resident physician, will locate in Newark to practice general medicine at South College Avenue and Kent Way, the former residence of Mr. and Mrs. John R. Fulton, on August first.

Dr. Mavromatis graduated from the Greek College, Smyrna; studied literature and began his medical studies at the famed University of Montpellier, France; graduated with an A. B. degree from the New York University, 1925, and from the school of medicine, Columbia University, 1929.

#### AETNA ANSWERS TWO ALARMS

Members of the Aetna Fire Company, after inactive service for a period of seven weeks, were summoned to two fires early last evening and early this morning, the first fire being a barn on the farm of S. Gray near Pleasant Valley School, which was burned to the ground before the fire company arrived. This year's hay crop and 35 rabbits and two pigs were destroyed. This alarm sounded around 7.30.

At 1.30 this morning the company was called to fight a fire in a shed owned by H. Simmons which contained a considerable portion of lumber and other material, resulting in a total loss. In the town there hasn't been a fire for a period of 13 weeks, which speaks very well for the fire prevention program of the Aetna Company.

#### BOY NEAR GLASGOW WINS FIRST PRIZE

Herbert Wilson Price, Jr., son of Representative and Mrs. Wilson Price of near Glasgow, was winner of first prize blue ribbon at the Kent-Sussex Fair, Wednesday, for the best Jersey Heifer Calf, and \$10.00 in gold for State championship. Prof. T. A. Baker acted as one of the judges.

#### NEWARK PLANT OF PHILLIPS CANNING COMPANY STARTS CANNING TOMATOES

Phillips Packing Company started this afternoon to can tomatoes at the local plant in Newark. They are very few local tomatoes coming in but they are being hauled by truck from New Jersey.

#### KU KLUX KLAN TO HOLD MEETING AUGUST 12

The Knights of the Ku Klux Klan will hold an open-air demonstration and naturalization midway between Cherry Hill and Andora on the Elkton-Fair Hill Road, on Wednesday evening, August 12, at 8 o'clock, standard time. J. L. Baskin, Imperial Klorkard of the National organization; Fred V. Larkin, Grand Dragon of Maryland, and others will speak. There will be music, firey cross, etc. The first degree will be conferred upon a class of candidates. Refreshments for sale on grounds. No admission. Plenty of free parking room. The public is cordially invited.

#### SUMMER SCHOOL STUDENTS ENJOY INFORMAL DANCE

Last Friday evening the students of the University of Delaware Summer School enjoyed an informal dance at Residence Hall. Music was furnished by the Delaware Collegians under the personal direction of Mr. Willard Crawford.

#### FRIDAY NIGHT DANCES DISCONTINUED

Due to the excessive heat the Friday night dances at the Diamond State Tea House have been discontinued for the present, but will be resumed later in the season.

#### ENTERTAIN FRIENDS AT FAREWELL PARTY

Mr. and Mrs. John Fulton entertained a few friends at a farewell party at their home. They are moving to Philadelphia today.

#### NOTICE

The discount period for capitation and town taxes ends tomorrow, Friday, July 31st. After this date there will be no discount.

#### EDWARD GIBSON TO OPERATE CREW-LEVICK SERVICE STATION

Mr. Edward Gibson, who has been associated with the Crew-Levick Company for a number of years, will operate the service station of the Crew-Levick Company, 114 Elkton Road, where he has been in charge, as an independent station.

Mr. Gibson will take over the operation and management of the station on August 1st, which will be known hereafter as the Gibson Service Station.

#### H. B. WRIGHT HARDWARE COMPANY IMPROVES PROPERTY

The owners of H. B. Wright Hardware Company are improving their property at the corner of Main and South Chapel streets by tearing down the one-story addition which was erected a number of years ago. This will give them an ideal place for outdoor display.

#### C. M. MUMFORD ACTS AS JUDGE

Carol M. Mumford, connected with the University of Delaware Agricultural Experiment Station, acted as judge of chickens at the Kent-Sussex Fair on Wednesday. Mr. H. S. Palmer has been spending the week at the Fair.

#### NEWTON SHEAFFER INJURED

Newton Sheaffer, son of Mr. and Mrs. Harold Sheaffer, was badly bruised and shaken when he and another boy collided when riding bicycles. The accident happened near Hollingsworth's coal yard on North College Avenue.

#### DR. RHODES IN FLORIDA

Dr. George W. Rhodes is attending the National Convention of Druggists which is being held in Miami, Florida, this week. He is a delegate from the Delaware State Druggists Association.

## AMERICAN STORE IN NEW QUARTERS

### Largest Store Between Philadelphia and Baltimore, With All Modern Equipment

#### MANAGED BY MR. HARLAN TWEED

One of the finest chain stores ever to be opened by any chain store company in a town of this size, was opened this morning by the American Stores Company to replace their other store in Newark. It is the largest store between Philadelphia and Baltimore, having all the latest improvements in equipment and refrigeration, with four electric fans and up-to-date ventilation, making it one of the coolest places in town.

The meat section takes up practically all of the right-hand side of the store, with the green vegetables and fruits attractively arranged in the center; the grocery department taking up the left-hand side and back of the store.

This store is a credit to Newark and Mr. Tweed is to be congratulated for his part in making this possible for the patrons of Newark and vicinity.

#### C. EMERSON JOHNSON HIT BY AUTOMOBILE

C. Emerson Johnson, the popular manager of the Rhodes Drug Store, was hit and severely bruised on Tuesday by an automobile driven by Mr. Charles Wells, of Elkton, Md., while crossing Main street. Mr. Johnson was dragged about ten feet and considers himself fortunate in not having his leg broken. He was able to resume his duties the next morning.

#### MOVED TO ROSELLE

Mr. and Mrs. William Duffy moved this week from South Academy street to Roselle.

#### CHIEF KEELEY RESUMES DUTY

Jan. Keeley, who was relieved of duty several weeks ago due to illness, reported back on Monday and resumed his duties as Chief of the Newark police force.

#### NEGRO ROBS LIFE INSURANCE AGENT OF \$95

George Poe, a life insurance agent at North East, Md., was a victim of a bandit Tuesday morning near Principio, while motoring to Havre de Grace to make his weekly report. He had occasion to stop near Principio and as he walked across the road, he was met by a middle-aged negro, who demanded he hold up his hands.

Poe not complying fast enough was dealt a stinging blow over the left eye with a blackjack, rendered unconscious, and robbed of \$95 in money.

By the time Poe regained consciousness the robber had escaped. Poe was taken to the Havre de Grace Hospital, where three stitches were necessary to close his wound.

Sheriff Albert Buckworth and Deputy Sheriff Coudon Reynolds were sent for and with the assistance of State Police a search was made, but the negro is still at large.

## Planning Big Sport Event In Elkton This Fall

Should the plans of Former U. S. Marshal Frank W. Mathues, who has a summer home along Elk River, materialize, Elkton will be the scene of a great gathering of sporting people in the early fall.

Mr. Mathues, who conducted very successful horse shows and shooting tournaments for the local hospital and Welfare Association last year, proposes to sponsor a program of prize fights to be held on Hill Top Farm, home of J. Ben Decker, on the outskirts of Elkton, and will make the affair the biggest ever held in Cecil county.

Mr. Mathues expects to have Jack Dempsey to act as referee, and will endeavor to have Schmeling, Carnera, Loughran, Jack Sharkey and other well-known heavyweights appear in the arena.

The former United States Marshal feels confident that the above fighters would appear for the proposed charity exhibition.

# The Market Basket

## Family Food Guide

Every meal—Milk for children, bread for all.

Every day—Cereal in porridge or pudding, potatoes, tomatoes (or oranges) for children, a green or yellow vegetable, a fruit or additional vegetable, milk for all.

Two to four times a week—Tomatoes for all, dried beans and peas or peanuts, eggs (especially for children), lean meat, fish or poultry, or cheese.

For variety, why not follow the culinary customs of people living in tropical countries and serve some Indian curry to your family? It is one of the most popular dishes of the Far East. It is hot and spicy, easy to prepare, and inexpensive, according to Fanny W. Yeatman, food preparation specialist of the Bureau of Home Economics of the U. S. Department of Agriculture. In the bureau's experimental laboratory, Mrs. Yeatman has tested several curries that are adaptable to American cookery, and recipes are available to the public on request.

Most persons associate curry with East India, but in reality it belongs to all Oriental tropical countries. Although its seasoning may vary somewhat with the country, curry is primarily a hot dish and as such acts as a stimulant for flagging appetites. Lack of appetite is a frequent accompaniment of hot weather even in our comparatively brief summer period, a situation which is intensified many times over in the torrid zone. The tropical school of cooking, which has developed through centuries of experience with high temperatures naturally aims to offset the effects of the weather. Consequently we might do well to take a hint from them and serve some of their special dishes in July and August.

Curries, which can be made of vegetables alone or of meat and vegetables, are good ways of using leftover meat as well as inexpensive fresh cuts of meat, according to Mrs. Yeatman. This should be welcome news to persons who are budgeting their food costs. The heel or the round of beef or the breast or neck of lamb will make as good a curry as one of the more expensive cuts, she declares. Fresh or cooked pork makes delicious curries, especially if combined with tart apples or green tomatoes.

Egg, chicken and fowl can also be used for making appetizing curries, but unless these are home grown products they, with the exception of eggs, are out of the low cost group. Inexpensive fish, fresh or canned, can also be used for curry.

Curry is an old dish even in the Orient. To curry is an ancient method of preparing meat and vegetables. In India it has been in existence since Vedic times, which means that it was cooked there 1500 years before Christ. The curry powder itself, from which the dish takes its name, can be bought ready prepared in this country for about 40 cents a bottle. This should last an average family many months. In India, curry is mixed daily from the various spices that give it its very distinctive flavor. Each Indian cook house has, as part of its equipment, a smooth flat stone and small stone roller, on which the spices are crushed and ground as needed. Some of the ingredients for curry powder are old familiar standbys to American kitchens, such as onion, garlic, and black pepper-corns. But green ginger, tumeric, caraway

seeds, dried hot chillis or peppers and coriander seeds and leaves are less frequent on our pantry shelves.

In addition to the onion that is used as a spice, one or two more are added to the curry during the cooking process, Mrs. Yeatman points out. This is cooked until perfectly soft so that its pulp makes the gravy thick. And being very thoroughly cooked, the onion is usually palatable even to those persons who ordinarily dislike its flavor.

As a general rule, curry is served with rice cooked so that each grain is separate. In India a chutney often accompanies curry. Mangos are the basis of the true chutney, but since they are not to be found in our markets, the bureau has developed some recipes that substitute chopped apples. One of these follows: If chutney is not available, Mrs. Yeatman suggests a tart dessert of fruit, either fresh or in a pie.

The cost of filling a week's market basket for a family of ten, on the basis of the low-cost food guide developed by the bureau, averaged \$14.86. This survey was made in 13 representative cities throughout the country. The prices were gathered from the average rather than the expensive type stores. Following are the cities listed according to the rate of expense for filling the market basket for ten: Kansas City, \$13.95; Chicago, \$14.00; St. Louis, \$14.10; New Orleans, \$14.18; Pittsburgh, \$14.38; Washington, D. C., \$14.42; Boston, \$14.66; Dallas, \$15.12; Philadelphia, \$15.19; Detroit, \$15.56; Charlotte, \$15.66; New York, \$15.68; Atlanta, \$16.25.

### Buying

A family of ten, including three adults and seven children, should buy every week—Bread, 25 to 35 pounds; flour, 3 to 5 pounds; cereal, 10 to 12 pounds; whole fresh milk, 43 to 56 quarts, or canned evaporated milk, 43 to 56 tall cans; potatoes, 30 to 40 pounds; dried beans, peas, peanut butter, 2 to 5 pounds; tomatoes, fresh or canned, or citrus fruits, 12 pounds; Other vegetables (including some of green or yellow color) and inexpensive fruits, 30 to 40 pounds; fats, such as lard, salt pork, bacon, margarin, butter, etc., 6 pounds; sugar and molasses, 7 pounds; lean meat, fish, cheese, eggs, 10 to 14 pounds; eggs (for children), 8 eggs.

### MENU FOR ONE DAY

**Breakfast**  
Cooked cereal Milk  
Coffee (adults) Milk (children)

**Dinner**  
Vegetable Curry  
Green Apple Pie Milk (everybody)

**Supper**  
Tomato Rabbit on Toast  
Baked Potato  
Tea Milk

### RECIPES

(These recipes serve 5 persons)

#### Vegetable Curry

1/2 cup rice, 1 cup diced onion, 1 cup diced carrots, 1 cup diced celery, 1 cup fresh or canned peas, 4 tablespoons butter, 1/2 teaspoon salt, or to season, 1/2 teaspoon curry, 2 teaspoons Worcestershire Sauce.

Wash and cook the rice in three pints of gently boiling salted water. Drain and put in a colander and pour hot water over the rice. Then stand the colander over steam until the grains swell and separate. Cook the vegetables in a small quantity of water and just before removing from the stove add 1 cup of canned peas. If fresh peas are available, cook them with the other vegetables. Add the salt, curry and sauce to the vegetable liquor. Make a ring of the cooked

rice, placing the vegetables in the center, and pour over them the liquid mixture. Serve very hot.

#### Green Apple Pie

6 to 8 green apples, 1 cup sugar, 1/4 teaspoon cinnamon, 1/4 teaspoon salt, 2 tablespoons butter, pastry.

Pare, core and slice the apples. Place in a saucepan with a very small quantity of water. Cook with a cover until the apples are partly tender. Add the sugar, cinnamon, salt and butter and stir until blended. Line a deep tin with pastry, and fill with the apples. Add the top sheet of pastry. Put the pie in a moderately hot oven (400 degrees F.) for 10 minutes, lower the temperature to more moderate heat (375 degrees F.) and bake the pie for 20 to 25 minutes, or until the apples are tender and the crust is golden brown. If the pie seems too tart, sugar may be added when served.

#### Tomato Rabbit

2 tablespoons butter or other fat, 1/2 cup finely cut celery, 1/2 green pepper (chopped), 1/2 small onion (chopped), 2 tablespoons flour, 1 pint canned tomatoes, 1/2 pound cheese (shaved thin), 1 teaspoon salt, 2 eggs, Tabasco sauce.

Melt the fat in a heavy skillet, add the celery, green pepper, and onion, cook for a few minutes, and stir frequently. Sprinkle the flour over the cooked vegetables, pour in the tomatoes, and add the cheese and salt. Cook over low heat and stir until the mixture thickens and the cheese is melted. Pour some of this mixture into the well-beaten eggs, then pour all back into the skillet, and continue to cook over low heat until thickened and creamy. Add a few dashes of Tabasco sauce and serve on crisp toast or crackers.

#### Apple Chutney

3 quarts chopped apples, 3 lemons, 1 quart cider vinegar, 1 quart dates (stoned and chopped), 1 pint tarragon vinegar, 2 pounds sultana raisins, 1 tablespoon ground ginger, 1 teaspoon paprika, 1 teaspoon salt, 1 onion chopped, garlic, 2 small cloves.

Wash, pare, and core the apples. Chop them with the lemons, as the acid will help to keep the apples from turning dark. Remove the seeds from the chili peppers. Mix all the ingredients. Boil gently until the apples are soft and stir the mixture occasionally with a fork. Bottle the chutney while hot and seal.

### CREATING LAWLESSNESS

Human nature—one of whose fundamental characteristics is the urge toward freedom—cannot be changed by legislation.

Age-old customs cannot be erased overnight by a law.

Here are truths that should be called to the attention of every lawmaker. An important reason for the prevalence of crime in America is that we have harassed the good citizen with a tremendous volume of hasty, unenforceable and ill-considered legislation. It will usually be found that law-abiding nations are those where the laws are designed to protect the rights of citizens, rather than to restrict them on the dubious theory that crime will thus be lessened.

We cannot curb lawlessness by merely passing more needlessly restrictive laws to break.

### WHY NOT THE OTHER 47 STATES

Prohibition law violators are being denied citizenship papers in Michigan.

## TALES... of the TRIBES

By EDITHA L. WATSON

### The Hopi

The Hopi call themselves "The Peaceful People," but they can fight like lions when they consider it necessary. Living as they do in a wild land of mesas and canyons, they have partaken of the nature of the country, and are aloof, implacable, and wary of the outsider. They consider themselves capable of attending to their own affairs, and resent interference.

Long ago, they moved from the villages at the feet of the mesas, building their picturesque homes on the elevations, where raiding enemies could not surprise them. Farming in the land below must have been a very exciting and dangerous occupation sometimes, when the fields must be cultivated almost furtively, and the farmer must have his weapons as close to hand as his digging sticks.

Farming under primitive conditions in scanty soil is a tedious work at best, but the Hopi know how to make the most of what they have. It is related that an agricultural expert was sent to the province of Tusayan, as Hopi-land is called, to show the Indians how to farm. They allowed him to experiment, but when growing time came, it was their own scanty corn, watered by hand, that made the crop, and the "expert's" field burned up under the ardent Arizona sun.

The Hopi religion includes fire-and-sun-worship, and also ancestor worship, and it is a thing to which they cling as closely as to their lives. At one time they were practically forced into adopting the Christian faith, but during the great Pueblo rebellion of 1680, they returned to their own beliefs, and only one Hopi pueblo, that of Awatobi, continued in the new religion.

Awatobi was thus a thorn in the side of the other Hopi villages. With the white man's religion, these people had also acquired their troublesome disposition, and were constantly harassing the people of the other pueblos. They would not return to the ancient faith, though they crafted some of it into their new beliefs, and adhered to this mixed religion with a tenacity seemingly inspired by the love of annoying their tribesmen. These chafed more and more under the continued harassing, and accordingly, one night when many of the Awatobians were gathered in a large kiva, their neighbors crept upon them, suddenly pulled up the ladder—their only means of escape—and threw down upon the trapped men firebrands, greasewood, and crushed red peppers, which they pulled down from where they hung drying on the houses. The other converts in the pueblo were hunted down and killed by their exasperated tribesmen, and only a few, mostly women who were especially proficient in the Indian arts, and children, were spared. Peaceful People, indeed!

This happened in 1700. That it is not a legend was proved in 1895, when Dr. J. Walter Fewkes of the Smithsonian Institution excavated the ruins of Awatobi, and found the fire-blackened remains of the once flourishing pueblo and its inhabitants.

Now the Hopi live very quietly on their mesa-tops. They cultivate crops on the land below, as they have done for centuries, and they cling to their old beliefs and ceremonies. People come from far lands to witness the famous Snake Dance, in which the "little brothers" of the Hopi are called upon to aid in prayers for rain, and so efficacious is their assistance, that, it is said, never more than three days elapse until it rains.

The Hopi raised cotton before the advent of the whites, and one of their early manufactures was cotton cloth, beautifully woven and often embroidered. Pottery making is another art for which they are famous, and although at present their skill in decoration does not flourish as it once did, they copy and adapt designs centuries old with considerable effect.

So they are once more the Peaceful People, but perhaps, if necessity should arise, they would again show the world that they know how to fight.

(© 1931, Western Newspaper Union)

Wanota, the Yanktonal chief, is described (in 1823) as wearing white buffalo skins, a necklace of grizzly-bear claws, red sticks in his hair; his face was painted vermilion, and he carried a turkey feather fan.

Tree rings are now used as a means of telling the age of ruined Indian buildings. A beam from Walpi, one of the Hopi pueblos, was cut in 1427—85 years before the discovery of America by Columbus.

Eskimo children had a greater variety of toys than any other. Their many dolls had fur clothing, and furniture.

The name "atogie," a cigar, is derived from Conestoga, where they were first made.

In 1778, according to historians, a woman presided over the Winnebago tribe.

## A \$1 Dinner for 4

How is your arithmetic? If you add these figures you will find the sum total is exactly one dollar. And if you know your dietetics, as well as your mathematics, you will find that the sum total of these foods is a perfectly balanced meal.

It follows then, if you are wise that you will serve this sort of meal at least one day a week, and you will be healthy and wealthy as well. The recipes are tested.

### Simple to Make

**Celery, Cabbage and Tomatoes:** Have one cup cabbage cut in fairly large pieces and one cup celery cut in inch lengths. Cook separately until almost tender.

Drain, add the contents of one 10-ounce can of tomatoes, salt and pepper to taste, and one small sliced onion. Simmer until tender.

**Blackberry Trifle:** Spread three-quarters cup of cornflakes in the bottom of a well buttered baking dish and cover with the contents of an 8-ounce can of blackberries from which the juice has been strained. Sprinkle one-fourth cup of sugar over, dot with one tablespoon butter, and cover with three-fourths cup of cornflakes. Pour in the blackberry syrup drained from the fruit, and bake in a moderate oven—375 degrees—for thirty minutes. Serve warm with light cream.

# GEORGE WASHINGTON'S TRAVELS

By James W. Brooks

Copyright 1930 by James W. Brooks  
All Rights Reserved

Historically Correct Sketches  
By CALVIN FADES

**P**ASSING years have transformed Fort Loudoun at the right, in Winchester, Virginia, into a domicile of peace. Aside from a bronze cornerstone tablet which marks its place in history, there is no trace of the days when George Washington was the trusted leader against Indian attack. The old cannon below faces a plain stone structure where he made his headquarters.

**I**N the rear of the transformed fort, in another yard, is this old well which Washington had his soldiers dig to insure permanent supply water for his command. It is 105 feet deep, cut through limestone rock, and is still in family use. Under Christ Episcopal Church at the right in Winchester, Thomas Lord Fairfax, friend and counselor of George Washington, is buried.

## Rochambeau and French Army Arrived At Newport, July 12, 1780

The first French army destined for an extensive land campaign in America during the Revolutionary War arrived at Newport, Rhode Island, July 12, 1780, under the command of Count de Rochambeau. These were the troops who later cooperated with the Americans at the siege of Yorktown where Great Britain lost Lord Cornwallis, an army and, as developed later, the war.

In commemorating the 151st anniversary of Rochambeau's arrival the Division of Information and Publication of the United States George Washington Bicentennial Commission notes it as a date of vast importance to the United States in their struggle for independence. On that July day in 1780 a French army arrived to join the Continentals under General Washington in the last big "push."

There had been French officers and troops in America before the arrival of Rochambeau, but aside from the few like Lafayette who were attached to Washington's army as volunteers, these were men under the command of D'Estaing at the unfortunate siege of Savannah. They took part in no other battle in America.

The French alliance certainly was an important factor in the ultimate success of the Americans. Under the leadership of George Washington, with the example of his indomitable courage ever before them, the Continentals and militiamen had waged a long, wearisome struggle against a great nation. Now they were to be aided by a powerful ally, strong enough to help write a glorious finish to the Revolutionary War.

The plight of the Americans may be seen from the following excerpt

## Demand Necessitates New Issue of Home Construction Bulletin

A revised edition of "Light Frame House Construction," a bulletin issued jointly by the Federal Board for Vocational Education, and the National Committee on Wood Utilization of the Department of Commerce, has just been released from the Government Printing Office.

While this bulletin, as announcements covering the first edition distributed last fall have stated, is intended primarily for carpenters interested in the technical phases of dwelling construction, it answers many questions with which the prospective home owner is confronted and contains usable information constantly needed by the contractor and builder. Many thousands of copies of the first edition of this bulletin have been sold to the home owning and house-building groups.

The second edition of this publication contains additional information concerning the allowable loads for wooden girders and beams to prevent decay; the construction of roof collar beams; as well as information on all other structural features of a frame house.

Framing methods; foundation sills and girders; columns, joists, and bridging; walls, partitions, and roofs; floors, sheathing, siding, and shingles; interior trim; and miscellaneous structural items such as chimneys, porches, and furring are all discussed in detail. In addition the physical characteristics of wood and the grading of lumber receive brief treatment in this bulletin.

The major portion of the publication is devoted to technical information relating to type jobs which are met with in the building of houses.

The reprint of this bulletin was made necessary by the heavy demand for the first edition which was exhausted several months ago. It may be secured from the Superintendent of Documents, Government Printing Office, Washington, D. C. A special rate is available for quantity lots.

## Depression Emphasizes Vocational Education Needs, States Report

Evidence of a realization on the part of State governments of the necessity for continuing their support of vocational education programs even in the face of the economic depression, is found in a statement made public today by Dr. J. C. Wright, director of the Federal Board for Vocational Education.

"We can conclude from the State reports," Dr. Wright states, "that the vocational education program in this country has stood the test of the world's greatest economic depression, a depression which has resulted in the curtailment of public expenditure in many fields. The depression has served to emphasize the fact that the necessity for vocational education in giving training to those persons who desire preparation for work as well as for helping those out of a job to adjust themselves to new occupations is even greater in times of depression than in normal times."

According to Dr. Wright, 19 States report an increase in State appropriations for the current fiscal year, totaling \$800,000. Only 7 States report decreases in their vocational training appropriations. These decreases total \$70,000, which leaves a total increase in the appropriations for the 46 States reporting of nearly \$750,000 available for additional schools and classes in vocational education.

Four States have increased their appropriations for vocational rehabilitation work, amounting in all to \$18,503, while only one State reports a decrease.

"The encouraging feature of the reports made by the 46 States," Dr. Wright declares, "is the upward trend in the financial support for vocational education and vocational rehabilitation by local communities throughout the country. Only two States report less support from local communities during the current year. On the other hand, one State reports a material increase, 20 States a general increase, and 11 States a slight increase; while 3 States indicate that the local support will be the same as last year."

"Every indication points to an increase in enrollment in vocational classes in agriculture, trade and industry, and home economics, the three fields with which vocational education has to do, in 31 out of the 46 States

## News and Comment

By Charles F. Scott

The common saying "A nine-days wonder" doubtless grew out of the fact that only an event of the first importance can hold the attention of the people for even so short a period as nine days. The super-importance of President Hoover's debt moratorium proposal can therefore be estimated when it is recalled that for three weeks now it has held the place of first importance on the news and editorial pages of the newspapers of Europe and America. Up to the date of this writing interest has concentrated chiefly upon the negotiations which have been going on in Paris, with daily telephone communication to and from Washington, between representatives of the United States and of the government of France. Politics in France is more delicately balanced perhaps than in any other country. The people are emotional and volatile, public sentiment is quickly aroused and under the parliamentary system can be made instantly effective. There is no point upon which French people are more sensitive than the relations of their country with Germany, and it was inevitable that when a proposal was presented which asked France to forego financial benefits of considerable magnitude in order that help might be extended to the tottering government of Germany it was but natural that the first French reaction should be one of suspicion, easily growing into resentment. In order to maintain itself in power, therefore, the French government was obliged to take this national sentiment into consideration. Thus, it happened that while accepting President Hoover's proposal "in principle" the French Premier made his acceptance of it contingent upon certain changes which he knew French sentiment would demand. The long drawn out negotiations have been addressed to the consideration of these changes. It looks now as if a basis of agreement had been reached, in substantial accord with the terms of the Hoover proposal, and that his timely and statesmanlike plan will be put into effect.

World-wide endorsement of the Hoover Plan continues to come from all over the world. In every country the proposal is regarded as promising vast possibilities, greater even than relief of the present disastrous world economic crisis. Of special significance perhaps is the comment which comes from Mussolini and Foreign Minister Grandi, of Italy, who describe the President's offer as "destined to be an historical event" and express themselves as confident that the proposal will create an atmosphere of world cooperation which will distinctly relieve the tension of recent months and ease the way for next year's disarmament conference. From many quarters comes expression of the conviction that actual relief of distressing economic conditions which is expected to follow the putting into effect of the Hoover plan will be accompanied by improvement in the morale of the world.

Of no less significance is the whole-hearted and enthusiastic approval expressed by Premier MacDonald of Great Britain in an address at an Independence Day dinner in London, describing the President's moratorium proposal as "an action of great wisdom, of great courage and of deep insight." The Prime Minister eulogized it as an event which causes world statesmen groping for peace and international contentment to "lift up our heads to seek a way out, to see hope and to get new courage and new energy to face our problems." It was in this address that Mr. MacDonald described the United States as "the greatest nation that now exists on the face of the earth," a tribute, considering its source, which well may make the heart of every American swell with pride.

## WEE DRAPS O' SCOTCH

Then there is the Scotchman who—Tried to get the mustache cup concession in the House of David. Went into a butcher shop and ordered a hog's head cut off just above the tail.

Studied mental telepathy before going off on a trip to cut down the cost of communicating with his wife.

Goes to a theatre when he feels ill because there is always a doctor in the house.

## SHARKEY, BOSTON HEAVYWEIGHT, BELIEVES HE CAN LICK SCHMELING

Jack Sharkey, big, brown and bilious, banged on the dinner table in his hotel so that the dishes rattled and the water jumped in alarm.

"I'll keep fighting," he growled, "until I get that Schmeling in the ring with me again. Then I'll give him the beating of a lifetime. He doesn't want to fight me again and in one way I don't blame him. He knows he'll get licked. But sooner or later he'll have to meet me again, and when he does, . . ."

The pale blue eyes of the Boston sailor flashed fiercely. He scowled and glared at his clenched fist. There will never be any trouble for any promoter engaging the Sharkey half of a match with the German who won their first meeting, and along with it recognition as a champion, on a foul in four rounds, after being soundly trounced in the first three.

Sharkey came to New York Monday to sign articles and start training for his fifteen round match with Mickey Walker, the former middleweight champion, in Ebbets Field, Brooklyn, July 22. A few hours later, Schmeling, hailed as a true champion after knocking out Young Stribling in the fifteenth round of their title go in Cleveland, the night before the Fourth, sailed for Germany. He will return in August, probably for a September fight with Primo Carnera, the Italian giant.

"He'd better not fight Carnera," Sharkey said. "The Italian will pound me down like sauerkraut in a barrel. Schmeling starts slow. Carnera starts fast. He'll club the German down before Schmeling gets going. Anyway, I understand Schmeling is afraid of Carnera and wants to fight Tommy Loughran instead."

Sharkey was not surprised that Schmeling whipped Stribling so badly in Cleveland. He was shooting off fireworks for his own children and all the offspring of the neighbors at Bow Lake, in New Hampshire, when the fight came in over the radio. He was too busy to listen, but his wife told him what happened.

"It was just what I expected," Sharkey said. "I knew Stribling would fold up the first time he was pressed. And that's what he did." Sharkey, weighing about 202 pounds, starts training today and expects to scale 195 for Walker, an overgrown middleweight who probably will weigh no more than 170. Sharkey can't see how his bout can even be a contest, but there's money in it and that's one of the most interesting things about the boxing business.

"Before I get through this year," he announced, "I want to knock out Walker, Loughran again, and Car-

## Spring-Blooming Shrubs Should Be Pruned Now

Flowering Enhanced by Attention to Buds on Summer Varieties

Since spring-blooming shrubs should be pruned immediately after flowering, the gardener who has not already pruned shrubs of this kind is advised to do so without further delay.

The summer pruning that can be done without injury on most ornamentals consists of pinching out the ends of the growing shoots. As growth of the plant is checked by this pruning, there is an increased production of flowering buds.

The wisteria is one of the many plants that can be made to bloom profusely during summer by pinching out the ends of its shoots. Other plants that tend to produce stems and foliage at the expense of flowers can also be made to produce flower buds by pinching out the ends of young growth at two-week intervals.

Evergreen are best trained by pruning off young growth that is being made this season. Do not prune severely, however, because evergreens resent too much cutting.

## COPPER INDUSTRY DEPENDENT ON INDUSTRIAL REVIVAL

Surplus refined stocks of copper in North and South America reached a total of 797,000,000 pounds in May, last—the largest excess ever known. Not within recent memory have deliveries to home consumers dropped below 100,000,000 pounds for any month—but in May they were but 90,530,000 pounds. Further, it is said that one must go far into the past to find a month where export shipments were as low as the May level of 53,368,000 pounds. Though there has been a 40 per cent reduction in mine output in the last two years, it has not been sufficient to offset decline in purchases.

Stimulated industrial activity at home and abroad which may result from proposed European debt moratorium should bring new and greater demands for copper. A 330 per cent increase in use of the metal in ten years by the light and power industry, demonstrates what growth of an industry means to copper. In the meantime it is to the advantage of all citizens in the mining states to make the lot of the mines as easy as possible through fair tax and legislative treatment.

### DO I BURN MORE TONS PER WINTER THAN I SHOULD ?

A good anthracite coal is the most economical household fuel known—as well as the safest. Sometimes, faulty methods of firing and draft management, or a bad condition of the furnace, will result in burning more coal than is necessary.

If you feel that such may be the case with your heater, we will be glad to have you phone us for free inspection and advice.

## Supply and Demand

Owing to low prices, there will be many farmers who feel that they cannot afford to gather certain crops of vegetables this summer. On the other hand, there are thousands of families who can make good use of those vegetables next winter.

Here is a wonderful opportunity for Welfare groups and other organizations to show their mettle. On the one hand great quantities of valuable foods going to waste, and on the other a great need. These two elements can be co-ordinated at slight expense or effort with newspaper and other fortunate individuals helping.

## Solving the Alien Problem

A report from the Department of Labor shows that during the first four months of this year, for the first time perhaps in our history, more aliens left the United States than entered.

A good many of those who departed, did so by request. It is estimated that there are probably 400,000 aliens within our borders who have no right to be here. Either they entered unlawfully, or they have committed some crime that makes them subject to deportation. Just as fast as these can be found they are sent back where they belong. It is not done harshly and the rights of the alien are given every reasonable safeguard. But if any appeal is taken to a court and the court decides they must go—they go.

Through the entire year, however, ending June 30, the number of aliens entering the country was considerably in excess of the number leaving—an excess, perhaps, of 60,000 to 70,000. But this is low beyond any precedent since the Civil War. We have only to go back to the ten years immediately preceding the World War to find foreigners pouring into America at the rate of a million or more a year. In 1914, 1,218,480 aliens entered the country. It is appalling to think what would have happened if a Republican Congress in 1921 had not put up the bars.

## Mr Hoover Calls A Halt

President Hoover's general order to the heads of all executive departments and independent agencies of the Government to cut expenses to the bone, the strongest and most sweeping of the kind he has yet issued, is designed to institute a rigid economy program which shall rule all administrative activities not only during this fiscal year, but shall have its effect on outlays during the year following. Plainly the President is disappointed with the official responses to his previous pleas for economy. In the light of the \$900,000,000 Treasury deficit on June 30 and his frequent admonitions to all departments to hold down on outlays, he had looked for constructive results to be reflected in the official estimates that were submitted to the Budget Bureau for the present fiscal year. Instead, they indicate expenditures that will actually exceed those made during 1931.

So it has come time for plain speaking, for commands rather than requests. The President now calls for new estimates, with definite statements of available appropriations for this and next year, and the amount it is believed necessary to spend, together with figures on the savings it is proposed to effect. These are to be furnished not later than August 17, and in the meantime the President virtually directs that available funds be expended only in accordance with imperative needs.

Even before the debt moratorium the Federal Government was confronted by its most serious financial problem since war times. As late as last month Mr. Hoover believed that with proper economy no tax increase would be necessary and he is still trying to avoid one. He is evidently determined that the administrative branch shall do its share. The responsibility will then rest on Congress to avoid the extravagance which marked its last session and to appropriate only for actual necessities. The scientific budget system provides the means for maintaining the Nation's finances on a sound basis. There have been ominous reports regarding Democratic and Insurgent plans for appropriations by the new Congress. Mr. Hoover is resolved that the next budget shall represent the minimum allowance on which the Government can function and also that the various departments shall now set the example of economy. There will then be no excuse for Congress to withhold its co-operation in keeping the Government's expenses well within its income.—Public Ledger.

## Fighting High Gas Taxes

Though legislatures in ten states succeeded in raising the gasoline tax this year, news dispatches and editorials in the nation's newspapers show that the popularity of the levy is on the wane and that the tax is no longer "painless."

For the first time in the history of the tax, there was active and widespread opposition to increased rates in many states. The rate was raised only after prolonged and bitter battles, and in several states opposition is continuing to show itself through activity for a referendum vote to offset legislative action. The plea of state officials that larger gas receipts are needed, is met by protests from motorists and business men that the time has come for economy and efficiency in government, rather than increased expenditures.

This should be good news for the harassed motorist, who, in addition to a gas tax of two to six cents a gallon, must likewise pay a personal property tax, a registration fee and a driver's license fee for the privilege of operating his car. Perhaps happier days are ahead in which he will not have to face the apparition of still higher taxes.

## Follow the Leader

President Hoover is giving his thought and best efforts to the task of leading the world out of the wilderness, and he should have the same hearty co-operation and support in this trying time of economic bewilderment that President Wilson had in the great national emergency that fell to his lot.

There is no politics in this plea—it is the first duty of American citizenship, and it was an obligation we conscientiously discharged when Mr. Wilson was President, as remembrance and records will show. The time has come to follow the leader. He is competent in every way; courageous, far-sighted and experienced and the master of great tasks.—Bluefield (W. Va.) Telegram.

# CONGRESSMAN ROBT. G. HOUSTON TO SEEK ANOTHER TERM

## Hopeful He Will Equal State Record in Serving Five Straight Terms at Washington

Congressman Robert G. Houston, of Georgetown, is a candidate for the Republican nomination for the House of Representatives in Washington, hopeful that he may be selected for the fifth consecutive term, thus equalling a State record.

Questioned by a reporter Saturday in the du Pont-Biltmore, Congressman Houston declared that his hat is in the ring for another term.

Congressman Houston's announcement marks the first one to be made by any of the major candidates of either political party, for nominations at the respective conventions in the Fall of 1932. He has served in Congress since 1924.

He is the first Representative in Congress from Delaware for four successive terms since John J. Milligan, of Wilmington, who served from 1831 until 1839.

ROBERT G. HOUSTON

## AVIATORS RELEASED BY CECIL COUNTY AUTHORITIES

James M. Sinclair and Arnold Rasmussen, were dismissed by the Cecil county authorities Monday when it was determined that the accident Sunday at White Crystal Beach in which Sinclair's airplane crashed into two automobiles was an unavoidable accident. Sinclair is from Claymont, and Rasmussen, pilot of the plane, lives at Polescroft, Pa. Sinclair arranged to reimburse the owners of the cars for the damage done.

In taking off from the field Sunday night on their return to Claymont after having spent the afternoon in taking passengers for flights, the machine struck an automobile occupied by Mrs. Thomas and Miss Peggy Marshall, both of Philadelphia, and also the car of John Gamble, of Clendenon, Pa. Mrs. Thomas and Miss Marshall were injured and both cars were badly damaged. Gamble escaped injury but both Sinclair and Rasmussen were cut and the plane wrecked.

Sinclair and Rasmussen were arrested after the accident but were allowed to remain in a hotel over night.

## FORMER REGISTER OF CECIL COUNTY DIES IN ELKTON

Reuben E. Jamar, 87 years old, died at his home in Elkton Sunday night. He was well known to most people of Cecil County. He succeeded his father, the late Reuben T. Jamar, as register of wills in Cecil county and served in that position 24 years until he declined to again be a candidate for the position. In 1903 he became associated with the Whitaker Iron Company in Wheeling, W. Va., and remained with that concern until ten years ago when he retired.

Mr. Jamar is survived by three daughters, Mrs. E. D. Lamdon, of Port Deposit, Misses Laura and Victoria Jamar of Elkton. The funeral took place yesterday afternoon at 3 o'clock, standard time, with services at his home. Interment in Elkton Cemetery.

## VALUE OF VOCATIONAL AGRICULTURE TO BE DISCUSSED OVER RADIO

The Future Farmers of America, the national organization of boys enrolled in all-day vocational agriculture classes in the United States, will be in charge of the Farm and Home Hour radio program to be given over the National Broadcasting Company network, Monday, August 10.

The features of this broadcast will be a concert by the United States Army Band, which will come direct from Washington, D. C., and an address by Dr. J. C. Wright, director, Federal Board for Vocational Education, who will talk from New York City.

Dr. Wright, who has selected as his subject "The Secret to Acres of Diamonds," will discuss the opportunities open to vocational agriculture students, and the training opportunities offered through the Future Farmers of America organization.

## GOVERNOR C. D. BUCK RAPIDLY RECOVERING

### Underwent Slight Operation at the Delaware Hospital

The condition of Governor C. Douglass Buck, who underwent a minor operation at the Delaware Hospital, Monday, was reported yesterday as being excellent. A late bulletin, by Dr. John H. Mullin, who performed the operation, said that the Governor was improving rapidly and that there is no danger of complications setting in.

It is expected that Governor Buck will return to his home near State Road, Monday or Tuesday of next week. It was said there, that the operation will probably not affect the plans of the family to spend a vacation at Martha's Vinyard. They had planned to leave early next month.

## DR. S. CLAUDE SYKES ELECTED

Dr. S. Claude Sykes was elected president of the Cecil Mutual Building and Loan Association at the annual meeting Monday night when the following were elected directors: Robert C. Thackery, Joshua Clayton, Dr. Fred H. Fahler, Dr. Vernon S. McKnight, Philip M. Groves, Joseph H. Sloan, William T. Vinsinger, A. Victor Davis, Dr. S. Claude Sykes and Harry W. Pippin.

Joseph H. Sloan was elected vice-president, Philip M. Groves, secretary, Joshua Clayton, treasurer, and Robert C. Thackery, attorney.

## MISS GRACE WELLS, ELKTON TEACHER, DIES

Miss Grace Wells, for more than 40 years a teacher in the Elkton schools, and loved by everyone, died Saturday evening at Union Hospital, after a brief illness. Miss Wells was stricken while spending her vacation at Wildwood, N. J., on Thursday and was brought to the Elkton hospital.

She was a daughter of the late George and Martha McCauley Wells, of Elkton, and with her sister the late Miss Elizabeth Wells, instituted the child welfare work at Elkton, and for years gave their time and money to the poor and needy childrer of the town.

She was a life-long member of the Elkton M. E. Church, and took an active part in Elk Chapter, Daughters of the American Revolution. Her funeral took place Tuesday afternoon at 2 o'clock from her late home, with interment in Elkton Cemetery.

## SUMMER SCHOOL TO CLOSE TOMORROW

The University of Delaware Summer School, which opened the middle of June, will close one of the most successful sessions in its history tomorrow. The enrollment, which was the largest of any session, necessitated having extra professors and separating some classes into two groups.

## Hard Work Only Trade Hope Says Financier

Frank Newburger, president of the Philadelphia Stock Exchange, and senior member of the firm of Newburger, Loeb and Company, said on his return from Europe last week that hard work is the only cure for the world depression.

Mr. Newburger, who has toured Germany, France and Italy, said, "I am extremely hesitant to express an opinion on the foreign crisis. At the moment there is already too much loose talk and hysterical thinking in the world. Any judgment at this time would be premature and perhaps harmful."

"There is one thing I am glad to say, however. The world over will see the farmer, the employer and the banker abandoning his faith in financiers and government aids and at last facing reality and realizing that hard work and hard work alone will bring us out of our difficulty. The first step in getting out of our present difficulties is getting our feet firmly on the ground."

## Shall Foreigners Write Our Laws?

One of the most astounding confessions ever made by any American statesman was that of Senator Thomas (Dem.) of Oklahoma, who in a public statement recently admitted that while the Smoot-Hawley tariff bill was under consideration he sent copies of it as it passed the House of Representatives to the legations and embassies of foreign nations inviting criticisms from their countries against the provisions of the bill, and particularly asking how the enactment of the bill would effect those countries. It is the first time in the history of the American Congress that a member of it has deliberately invited foreign attack upon a measure of legislation pending before that body. To ask the criticism of foreigners upon American legislation and then to attack that legislation on the score that foreigners criticized it is certainly a new idea of loyalty.

# LARGE CROWD ATTENDS OUTING OF RED MEN IN NEWARK

### Newark Men and Women Win Prizes

About 300 members of the various tribes of Red Men and Council of Pochontas attended the annual outing at the Red Men's Fraternal Home here on Saturday afternoon. The affair was held on the spacious lawn of the home. There were various athletic events for which prizes were offered and an interesting program by the Ninth Ward Dramatic Club of Wilmington, in charge of William Wable. A picnic lunch was served on the grounds during the afternoon.

Sixteen orphans that are being cared for by the order were special guests of the Red Men's Orphans Board, of which Past Great Sachem Jesse Semerteen is chairman and Frank Zebly secretary. Past Great Sachem J. Carl Barber, of Wilmington, was chairman of the entertainment committee that planned the affair, while Past Great Sachem James Faulkner was chairman of the sports committee.

The winners in the various athletic events follow:

50-yard dash for women—First, Mrs. A. A. Zeigler; second, Mrs. James Faulkner; third, Mrs. Frank Balling.

100-yard dash for men—First, Walter White; second, Frank Toy; third, Lawrence Jones.

25-yard dash for boys under 8 years

—First, Paul Robinson; second, Andrew Tryens; third, Douglas Robinson.

Peanut race for girls between 8 and 14 years—First, Mary Wilson; second, Jessie Semerteen; third, Elizabeth Rose.

Peanut race for boys 8 to 14 years of age—First, F. Smith; second, B. Tryens; third, J. Semerteen.

Potato race for men—First, Mark P. Malcom; second, L. Jones; third, Water White.

Potato race for women—First, Mrs. Mark P. Malcom; second, Mrs. Wilson; third, Mrs. Woolridge.

Throwing baseball for distance, women and girls—First, Henriette Bolen; second, Mrs. Mark P. Malcom; third, tie between Mrs. Clough and Miss Beck.

Frank H. Balling, who for the past seven years has been collector of wampum of Minnehaha Tribe of Newark, and who is a candidate for Great Junior Sagamore at the annual meeting of the Great Council in the Fall, was among the guests at the outing.

Mr. Balling has a wide circle of friends among the members of the order, many of whom are boosting him for the office.

## NEWARK CHILD UNINJURED IN AUTOMOBILE ACCIDENT

Mrs. Elizabeth A. Green, 60, and her daughter, Miss Laura Green, 27, residing at Seaford, were injured in an automobile accident, Sunday morning at 10.30 o'clock, on the highway, near Woodside. Mrs. Green is the wife of Captain George W. Green, who retired several years ago. She and her daughter, accompanied by her son, Captain O. Clarke Green, and granddaughter, Alva Dean, 9, daughter of Mr. and Mrs. Elmer Dean, of Newark, were on their way to Chesapeake City, Md., where the daughter was going to board the barge, Wissahickon, of which her brother, John W. Green, is captain, for a voyage with him. The car, driven by her son, collided with a car that came out of a side road, driven by a Mr. Jones, of near Woodside. Mrs. Greene received a broken hand, bruises and suffered greatly from shock. She was thrown into the

bottom of the car by the impact. Her daughter, who was sitting on the front seat with her brother, was thrown forward against the windshield, which luckily did not break, the young woman escaping with bruises and a shaking up. The other occupants of the Green car escaped injury. Jones also escaped injury, but his car was wrecked. The Green car was only slightly damaged.

## UNION SCHOOL P. T. A. TO MEET AUGUST FIFTH

Plans for the coming school year will be discussed at a meeting, called by Mr. Stewart Pryor, president of P. T. A. of Union School, to be held in the school building, at 8 o'clock, standard time, on Wednesday evening, August 5. A good attendance is desired.

**PERSONALS**

Mr. and Mrs. Roland Marine, Mr. Oscar Knox, Mr. and Mrs. Tweed and children, Anita Thoma, spent Sunday at Rehoboth Beach and Ocean City, Md.

Mr. and Mrs. John Culver and Mr. Leslie spent Sunday with Mrs. Culver's mother, Mrs. Bertha M. Leas of Maryland, Md.

Mr. and Mrs. H. J. Gaerthe spent the week-end visiting in Philadelphia.

Miss Ethel Stephan, of Prospect Heights, is visiting relatives in Philadelphia.

Mrs. Frank Balling and two sons, Frank, Jr., and Billie, are visiting Mrs. Balling's sister, Mrs. George Newman, of Salford, Pa.

Mrs. John Kelley and little daughter, Mary Elizabeth, of Korner Ketch, spent Wednesday with Mrs. Kelley's mother, Mrs. D. C. Chalmers.

Mr. and Mrs. H. B. Herr, of Mt. Washington, Pittsburgh, Pa., have been visiting Mr. Herr's sister, Mrs. Newton Sheaffer. Last Wednesday Mr. and Mrs. Sheaffer took their party for a cruise on the Chesapeake Bay.

Miss Alice L. Fell is spending a part of her vacation this week in Philadelphia and Atlantic City.

Mr. and Mrs. William Haggerty, of Jackson, spent the week-end with Mr. and Mrs. Elmer McCormick.

Mr. and Mrs. Wm. J. Sullivan, Mr. and Mrs. Angelo Cataldi and Miss Victoria George spent Sunday in Jersey, Pa.

Little Miss Octavia Cataldi is spending a week with her aunt in Wilmington.

Mrs. E. T. Whitney and daughter, Louise, of Bethlehem, Pa., were guests at the home of Mrs. Mark P. Malcom, Monday night. Miss Mae Malcom returned home with Mrs. Whitney to spend the remainder of the week.

Rev. Samuel L. Irwine, pastor of the Christiana Presbyterian Church, has purchased the home on Lovett avenue owned and occupied by Mrs. Oliver Rothwell. Mr. and Mrs. Irwine will move from Wilmington into their new home September 1st.

Mrs. Oliver Rothwell, of Lovett avenue, has purchased Mrs. Bennett's property on Academy street and will take possession September 1st.

Mrs. James Barnes and children, Jean and Kenneth, and her mother, Mrs. Lucie Baird, are spending this week at Ocean City, Md.

Berbert Henning, who has been spending the past few weeks at Fort Myers, Va., was home over the week-end. He returned this week for another week at the camp before returning home.

Miss Virginia Dameron spent the week-end in Rehoboth with Miss Barbara King.

Miss Dorothy Stoll, who has been spending the past week with friends at Red Point, Md., returned home Sunday.

Mr. and Mrs. Randolph Lindell entertained Mrs. Samuel Stewart at dinner, on her birthday anniversary, July 23rd.

Catherine Shellender is spending a week's vacation at Charlestown, Md.

Mrs. J. Earl Newman is spending sometime at Rehoboth, Delaware.

Mr. and Mrs. Frank Cohee of Clayton, Mr. and Mrs. Lewis Dickey of Stanton, Miss Lavenia McCafferty and George McCafferty of Philadelphia spent the past several days with Mr. and Mrs. J. Harvey Dickey at Rehoboth.

Raymond Chalmers returned home Sunday evening, with his aunt, after a week's vacation at Rehoboth.

G. R. Sinclair has returned from a business trip in Europe.

J. Irvin Dayett is attend the Kent-Danvers Fair at Harrington this week.

Frank Wilson, George Townsend, George W. Rhodes and Dr. R. E. Price are planning to leave on Saturday for a motor and camping trip to Vermont.

John M. Wingate, of Paulsboro, N. J., and Jas. D. Caulk, Jr., of St. Michaels, Md., spent the week-end with W. A. Singler. On Tuesday, the party, with Jas. P. Hoopes of West Chester, motored to Washington, N. C., for the day.

Miss Mary Johnston, of Wilmington, is the guest of Mrs. George W. Danby.

Mr. R. Goodwin and Mr. and Mrs. J. C. Kakavas left yesterday for a vacation in New England.

Bernice Smith, of Federalsburg, Md., who has been visiting her aunt, Mrs. T. A. Baker, returned home Sunday.

The Middleton W. Hansons left on Wednesday for a visit in Baltimore.

Mr. and Mrs. George W. Baker and daughter Ann are spending the month of August at Amherst, Mass.

Reid Stearns and Bobbie Jones have just returned from a stay at the Boy Scout Camp. Buddie Cobb will remain for a week or two longer.

Anna Gehrold is undergoing a tonsil operation in a Wilmington hospital, today.

Miss Mary Jane Rose, daughter of Mr. and Mrs. Lee Rose, is spending part of her vacation at Camp Otonka, Dagsboro, Del.

The G. M. Gilligans are leaving Saturday for Hartford, Conn.

Miss Leona Brandt has returned to Philadelphia after a visit with her sister, Mrs. A. E. Tomhave.

Mr. and Mrs. P. B. Myers and children, Allen and Margaret, will leave on Saturday morning for a motor trip to Thousand Islands and then on to Ohio.

Mrs. W. Herbert Hall and children, Billy and Dicky, of Baltimore, will spend the week-end with Mr. and Mrs. James Barnes.

Miss Lucy Mumford, of Emporium, Pa., is visiting her brother, Mr. Carl Mumford, of Kells avenue.

Misses Dorothy Jane Moore and Eleanor Mackie are spending some time in Rehoboth as the guests of Misses Edna Coleman and Henderson Smith.

Mr. and Mrs. Isaac Frost, of Long Island, visited Mr. and Mrs. Harry S. Moore, on Saturday.

Miss H. M. Wollaston, of South College avenue, is visiting friends in Bridgeport, Conn., and in New Hampshire.

Mr. and Mrs. W. M. Coverdale entertained the following guests on Sunday: Mr. and Mrs. James W. Deming of Middletown, Mr. and Mrs. J. D. Walker, Audrey Walker, Mr. and Mrs. James E. Workman, Doris and Robert Workman, Mr. and Mrs. Charles Ent of Wilmington, H. E. Denning of Washington, R. A. Coverdale of Philadelphia, Mrs. David C. Rose, Mrs. Margaret Cam and Miss Martha Elliott of Newark.

Miss Ann Ritz is spending a few weeks in Boston.

Mr. and Mrs. D. W. Signer and daughter Betty, of Haddonfield, N. J., were guests of Mr. and Mrs. W. M. Coverdale several days last week.

Mrs. H. B. Wright, Mrs. Norma Thomas, Hughes Thomas, Adelle Thomas and Loxley Jacobs motored to Atlantic City last Friday. Yesterday they were Dover visitors.

The Young People's Missionary Society of the M. E. Church went on a moonlight boat ride last night.

Ratio of Representation: Each state has two senators. House representation is still based on 1910 census—one member to each 211,877 population but reapportionment on 1930 census has been ordered.

Cabinet

Department Heads (in order of presidential succession): State, Henry L. Stimson, N. Y.; Treasury, Andrew W. Mellon, Pa.; War, Patrick J. Hurley, Okla.; Justice, William D. Mitchell, Minn.; Post Office, Walter F. Brown, Ohio; Navy, Charles F. Adams, Mass.; Interior, Ray L. Wilbur, Cal.; Agriculture, Arthur M. Hyde, Mo.; Commerce, Robert L. Lamont, Ill.; Labor, William N. Doak, Va. Salary of each \$15,000.

Supreme Court

Chief Justice: Charles E. Hughes, N. Y. (Rep.), salary \$20,500. Associate Justices: Harlan P. Stone, N. Y. (Rep.); Oliver W. Holmes, Mass. (Rep.); Pierce Butler, Minn. (Dem.); Willis Van Devanter, Wyo. (Rep.); James McReynolds, Tenn. (Rep.); Louis D. Brandeis, Mass. (Dem.); George Sutherland, Utah (Rep.); Owen J. Roberts, Pa. (Rep.). Salary of each \$20,000.

**SAFETY AND HEALTH IN CHILDREN'S SUMMER CAMPS**

The children's camp has become something of an American institution. Camps of various sorts, public and private, are the annual vacation sports for thousands of children, and as such play an important part in the development of the next generation. A well equipped, well-operated camp can be a strong influence for good health and citizenship; by the same token, an overly-commercialized carelessly run camp may be a genuine menace.

In order to make a contribution to the solution of the problems of health and safety in camps, the National Bureau of Casualty and Surety Underwriters financed J. Edward Sanders, Associate Professor of Education at Colgate University, to make a thorough study of the camps. Under the title, "Safety and Health in Organized Camps," the National Bureau has now published Mr. Sanders' summary of his two-year survey of 617 summer camps. It is of prime interest to parents and educators and all who take an interest in child health and safety. It gives information on present state of camps and suggests means of improvement.

The book shows that camps, on the whole, are both safe and healthful places for children. Good camps have medical attendants close at hand, and sanitary conditions are of a superior order. There are, however, camps which are unfortunate exceptions to the rule. It is here that the parent must make himself felt by a thorough-going investigation of any camp to which he considers sending his children.

From the standpoint of national health and safety this study of summer camps is an illustration of humanitarian work only secondary in importance to the National Bureau's successful campaign to prevent accidents to school children.

**IVY CROW TEMPLE**

Ivy Crow Temple, No. 4, L. G. E., met in I. O. O. F. Hall Saturday evening for the regular weekly business session, with a good attendance.

**OBITUARY**

**Mrs. Regina Armstrong**

Mrs. Regina Armstrong, wife of John P. Armstrong, died Tuesday morning at her home here, after a long illness.

The funeral will take place from her late residence Friday morning with solemn requiem mass in St. John's R. C. Church, in Newark, at 9:30 o'clock. Interment will be in the Catholic cemetery.

Mrs. Armstrong is survived by three children, Thomas Pilling Armstrong, of Winston-Salem, N. C.; Paul Arunah Armstrong, of Jamesville, N. Y., and Miss Manuella M. Armstrong, who lives at home; four sisters, Mrs. Herman R. Tyson, Mrs. Walter H. Steele, Miss Emma Pié, Miss Rosalie Pié, and three brothers, Reeve Pié, Paul F. Pié and Leo Pié.

Mrs. Armstrong was born and lived her entire life in the vicinity of Newark. The old Pié family homestead was formerly where the Red Men's Home is located now.

**PLAY TO BE ONE FEATURE OF MILK PRODUCERS MEETINGS**

Two meetings of New Castle County Milk Producers are to be held next week in Middletown and Newark, according to an announcement made by officials of the Inter-State Milk Producers' Association. Presentation of a one-hour play; talks on the 1932 milk selling plan and a few "Biting Remarks," by Happy Goldsmith, a world famous humorist, are to be features of the programs.

On Monday evening, August 3rd, at 8:00, standard time, the meeting at Middletown will be held in the auditorium of the new Middletown High School building, while in Newark on Thursday evening of the same week the meeting will be held in Wolf Hall at 7:30, standard time.

The programs for the two meetings are the same and will be as follows: "New Developments in the Quality Requirements," a talk by C. I. Cohee, secretary of the Philadelphia Inter-State Dairy Council. "The 1932 Milk Selling Plan," a discussion of the future plans for selling milk in this territory, led by Fred Shangle, vice-president of the Inter-State Milk Producers' Association. "Happy" Goldsmith, a humorist under the employ of the Dairy Council, will give a selection entitled "Biting Remarks." Mr. Goldsmith has appeared in New Castle county at previous meetings of this nature.

"The Second Trial of Bill Shiftless" will be the play presented by the office representatives of the Dairy Council and Milk Producers' Association from Philadelphia. All milk producers in the county are invited to attend these meetings.

**MISS IDA M. DAVIS, ELKTON MILLINER, DIES**

Miss Ida M. Davis, of Elkton, died late Wednesday afternoon, July 22, at the Chestnut Lodge Sanatorium, at Rockville, Md., where she had been under treatment following an illness of several months.

Miss Davis was a daughter of the late William T. and Duella Kershaw Davis, of Elkton, and was sixty-one years of age. Practically her entire life was spent in Elkton, where she was engaged in the millinery business with her sister, Mrs. Lena L. Wilson, her pleasing manner making her many warm friends. She was a member of The Gleaners of the Elkton M. E. Church and active in charitable work. In illness or in sorrow she was the first to tender sympathy and service, and many a sufferer has been cheered by her ministrations. She is survived by three sisters, Miss Dora E., Lena L., wife of D. Warren Wilson, and Miss Duella Davis, all of Elkton. Funeral services were held Saturday afternoon.

**ELLIS DOWNHAM ARRESTED CHARGED WITH ENTERING**

Saturday night Wilson T. Wright, of Elk Mills, heard a noise in his house and on investigation found Ellis (Caddie) Downham in the house. He had entered by removing a screen and breaking the glass, but pretended to be asleep and claimed that he was very drunk and did not know how he got into the house.

Downham had been engaged in a brawl earlier in the evening, disturbing the peace of the town. He will be given a hearing today before Police Magistrate Manly Drennen, of Elkton.

**NORGE**  
ELECTRIC REFRIGERATOR

**The part you never see is the best part of the NORGE**

When you look at a Norge Electric Refrigerator you can see the beautiful design and lasting finish of its cabinet...

You can see and appreciate the convenient height and arrangement of the shelves... the spring hinged door that seals the freezing compartment... the "Water-voir," the convenient water cooler that's always handy but never in the way... the freezing control and defrosting switch, placed right where easiest to use.

But you might have a Norge for years and hardly realized it has a mechanism at all—except for the perfect refrigeration it gives you. Only Norge has the Rollator... simple, compact, powerful, almost everlasting... the kind of mechanism you can forget from one year's end to the next.

When you are ready to select your electric refrigerator, by all means see the Norge before you buy.

The Norge is manufactured by Norge Corporation, Detroit, a Division of Borg-Warner, one of the world's largest makers of automotive parts, including free wheeling.

\*The Water-voir is extra equipment, available for all models at moderate price.

# GAME AND FISH LAWS

## STATE OF DELAWARE

1931

Correspondence intended for the Board of Game and Fish Commissioners should be addressed to the Chief Game and Fish Warden, Clarence S. Foster, Dover, Delaware.

BOARD OF GAME AND FISH COMMISSIONERS  
DOVER, DELAWARE

President, Robt. P. Robinson, Wilmington Vice-President, Wilbert Rawley, Leipsic  
Secretary-Treasurer, John S. Isaacs, Ellendale

### NOTICE

The Newark Post, by popular demand, starts this week to publish in its columns the Game and Fish Laws of the State of Delaware together with an abstract of the Federal laws and regulations for the protection of Migratory Birds. To all interested, we earnestly request you to carefully read these laws, not only to acquaint yourself with the changes, but also to be able to inform others, if necessary, to protect the game and fish of our State.

One of the interesting things to know is that every person holding a license for hunting or fishing prescribed by law can arrest violators. The Delaware laws in relation to Migratory Birds do not, in some respects, conform to the Federal Regulations. For the information of the public The Post will also publish an abstract of the Federal Laws and Regulations for the protection of Migratory Birds.

Where the Federal and State laws conflict, the law which is the most restrictive governs.

### OPEN SEASONS

	Begin	Ends
Frog	May 1	Dec. 31
Squirrel	Sept. 1	Oct. 15

### DELAWARE LAWS

#### SECTION 1

2358. Sec. 1. Board of Game and Fish Commissioners; Establishment; Appointment; Number; Terms of Office; Vacancies; Compensation; Expenditures; How Paid.—The Board of Game and Fish Commissioners of the State of Delaware is established and shall be known and termed as such. Said Board shall be appointed by the Governor and consist of three Commissioners, one from each of the Counties of this State, not more than two of whom, serving at the same time, shall be from one political party. The three Commissioners first appointed under this Section shall be appointed and commissioned for terms of two, four and six years, respectively, and their successors shall be appointed and commissioned for terms of six years. Any vacancy on said Board shall be filled by the Governor by appointment, and commissioned for the unexpired term in which the vacancy occurs. The members of said Board shall receive three hundred dollars a year for their services on said Board, also their expenses incurred in attending to their duties on said Board; said salaries, and all expenditures to be made by said Board shall be paid only out of funds received by it from the sale of hunting and fishing licenses and from fines and forfeitures imposed and received for violations of the game and fish laws of this State.

2359. Sec. 2. Bond; Condition; Oath.—Each member of said Board before entering upon the duties of his office, shall give bond to the sum of five thousand dollars to the State of Delaware, with two or more personal sureties or one surety company, in either case the surety to be approved by the Secretary of State, conditioned that he will well and truly account for and apply all moneys which may come into his hands by virtue of his said office, and that he will fully and faithfully perform the duties of his said office. He shall take and subscribe the oath or affirmation required by the Constitution of this State, and be commissioned by the Governor.

2360. Sec. 3. Official Seal and use thereof; Game and Fish Protection; Fines from Licenses and Fines; Disposition of; Expenditures; For What Purpose.—Said Board shall have an official seal to authenticate all licenses, papers and documents issued by it in its official capacity, shall have the management of all matters pertaining to game and fish protection, shall receive all funds arising from the sale of hunting and fishing licenses and from fines and forfeitures imposed for violations of the game and fish laws of this State, and shall have full control thereof and full discretion in the expenditure of the same in the purchase of supplies, printing and publishing game and fish laws, employment of wardens, salaries of officers, restocking the State with game and fish, protecting and preserving the same, the enforcement of the game and fish laws of this State, and in the name of the State, in leasing or purchasing land for game propagation.

2360a. Sec. 3a. Funds Paid to State Treasurer; When; How Expended.—The said Board shall, in each month of each and every year, pay over to the Treasurer of the State of Delaware, and at the same time deliver to said Treasurer a statement of all funds arising from the sale of hunting and fishing licenses and from fines and forfeitures imposed for violations of the game and fish laws of this State. The said Treasurer shall keep all such moneys in a separate fund and shall pay over or expend said fund or any part thereof only on the warrant of said Board.

An Act Requiring the Board of Game and Fish Commissioners to Make the State Treasurer the Depository of All Its Income, and Directing the Manner in Which Its Expenses Shall be Paid.

Sec. 1. That from and after the first day of July, 1931, the Board of Game and Fish Commissioners shall, and are hereby required, to make the State Treasurer the depository of all their income from fees, operations and all other sources, and said deposits shall be credited to the General Fund. All disbursements made by the said Board for their expenses or other authorized ex-

pensitures shall only be paid by the State Treasurer out of funds appropriated by the General Assembly for that purpose upon vouchers issued by the proper officers, designated by said Board, and approved by the Auditor of Accounts.

Sec. 2. The funds remaining in the possession of said Board on June 30, 1931, shall not revert to the General Fund, but shall be expended by said Board for its expenses during the fiscal year, ending June 30, 1932, but not thereafter.

Approved April 29, 1931.

2361. Sec. 4. Accounts and Books; Open for Inspection; Annual Report; When; Character Of; Publication.—All accounts and books kept by the said Board shall be open at all times for inspection of all the members thereof and on the thirty-first day of December, A. D. 1912, and every two years thereafter, the said Board shall make a full and complete report of the official business transacted of licenses issued, together with all fees, fines, and forfeitures, collected and all moneys received from other sources, shall show the number of Wardens employed, and give all necessary information concerning the affairs of the said Board. Such report shall be published in pamphlet form.

2362. Sec. 5. Form of Licenses.—Said Board shall prescribe the form of hunting and fishing licenses.

2363. Sec. 6. Arrests; Powers to Make; Game Wardens Power to Appoint; Bond.—The members of said Board shall have authority to arrest without warrant for all violations of the game and fish laws of this State, to carry out the provisions thereof, and to appoint game wardens who shall have like power and be subject to and sworn during the pleasure of said Board. Said wardens shall give such bond for the faithful performance of their duty as may be required by said Board.

2364. Sec. 7. Peace Officers ex-Officio Deputy Game Wardens.—All sheriffs, deputy-sheriffs, constables and policemen, or other peace officers of this State shall be ex-officio deputy game wardens.

2365. Sec. 8. Certificates to Scientific Collectors; Application For; Fee For; Bond and Forfeiture; Certificate Void, When.—Certificates may be granted by the said Board to any properly accredited person of the age of fifteen years or upwards, permitting the holder thereof to collect birds, their nests, or eggs, for strictly scientific purposes. In order to obtain such certificates, every applicant for the same shall present to the said Board written testimonials from two well-known scientific men, certifying to the good character and fitness of the said applicant to be entrusted with such privilege, and shall pay to said Board one dollar to defray the necessary expenses attending the granting of such certificates and must file with said Board a properly executed bond in the sum of two hundred dollars, signed by two responsible citizens of the State as sureties. This Bond shall be forfeited to the State and the certificate to become void upon proof that the holder of such certificate has killed any bird or taken the nest or eggs of any bird for other than strictly scientific purposes.

2366. Sec. 9. Game Birds, Animals or Fish for Scientific or Propagating Purposes; Permit to Take, Have in Possession or Transport.—The said Board upon the payment of one dollar may issue permits to any person to take, capture, have in possession or transport not more than ten pairs of any one species of game birds, animals or fish within this State, when satisfied that such person applying for said permit desires the same exclusively for scientific or propagating purposes.

An Act to Amend Chapter 74, of the Revised Code of the State of Delaware, Relative to Game, by Making It Compulsory That All Game Breeders of Game Animals and Birds be Required to Obtain a License.

Sec. 1. That any person, persons, partnership, company or corporation now engaged or who may hereafter become engaged in the breeding of game animals or game birds for commercial purposes shall be, and are hereby required to obtain a license to engage in or carry on said business or industry from the Board of Game and Fish Commissioners for which he shall pay to the said Board of Game and Fish Commissioners a fee of Ten Dollars (\$10.00) for each and every year.

Sec. 2. The provisions of this Act shall not apply to birds or animals raised by or for the State Game Commission, or to any person engaged in the breeding of game animals or game birds the total of which shall not exceed twenty-five in number.

Sec. 3. A permit to sell any game animals or game birds shall be required of said breeder to ship said game animals or game birds out of this State. Said permit to be obtained from the office of the Board of Game and Fish Commissioners. When such game birds or game animals are shipped out of the State a tag permitting such shipment must be fastened to such crate or carrier, carrying said game animals or game birds.

Sec. 4. Any person violating any of the provisions of this Act, shall upon conviction thereof be subject to a fine of Ten Dollars (\$10.00) for each and every offense.

Approved March 23, 1931.

2366a. Sec. 9a. The Board of Game and Fish Commissioners, upon the payment to said Board of a fee of one dollar, may issue a permit, in accordance with such rules and regulations as said Board may prescribe, authorizing the holder thereof, under the supervision of said Board, at any time, to take carp or other non-game fish by means of nets from any of the ponds or fresh waters of this State; PROVIDED, that, any game fish taken in such nets shall as quickly as possible be returned to the water.

2367. Sec. 10. License Holders May Arrest Violators Without Warrant.—Every person holding a license for hunting or fishing as prescribed by law, is authorized to arrest without warrant, violators of the Game and Fish Laws of this State.

2368. Sec. 11. Land Owners and Agents May Arrest Violators Without Warrant.—Any freeholder or leaseholder or member of his family, or any person in his employ, is authorized to arrest, without warrant, any person or persons who shall, upon his freehold or leasehold, commit any violations of sections 1 to 14, inclusive, of this Chapter, or any violation of the Game and Fish Laws of this State.

2369. Sec. 12. One-Half Fines to Person Causing Arrest; Game Wardens and Peace Officers Excepted.—Every person, other than regularly salaried Game Wardens and peace officers, who shall arrest or secure the arrest of any violator of the game and fish laws of Delaware shall receive one-half of all fines imposed and collected for the violation of the law for which he makes or secures the arrest.

2370. Sec. 13. Confiscation of Game and Fish Unlawfully Taken.—Said Board shall have power and is directed to confiscate all game and fish unlawfully taken or had in possession, and to dispose of the same by destroying it or distributing it among charitable institutions.

2371. Sec. 14. Organization, Proceedings and Meetings of Board.—Said Board shall have full authority to regulate its organization, proceedings and times and places of meeting.

2372. Sec. 15. Propagation and Distribution of Food Fish and Game; Appropriation; Payments; When and How Made; When Withheld.—Six hundred dollars is annually appropriated out of any moneys of the State not otherwise appropriated, to be expended for the hatching, propagating and distribution of valuable food fish and game in this State, as nearly equally as may be through the three Counties.

(Continued Next Week)

## Modern Methods Replace Old In New Gold Camp

Scossa, Nevada's new gold camp, clusters around the automobile service station instead of, as in old days, the saloon.

A generation ago, the first visible outpost of the mining camp was the saloon. Today, times have changed. The first visible outpost is the service station.

The above picture is a snapshot of Scossa, a new gold camp in Nevada, the last stand of the American gold fields. Yet in its toddling infancy, with railroads a distance of over twenty miles on either side and with no paved highway, Scossa already has its first automobile station, the first carrier of civilization.

The new deposits are so rich and ample that everyone from desert rats to mining engineers is predicting a brilliant future for the camp that has sprung up there.

Development work has gone ahead steadily and it is definitely proven that a territory ten miles on either side is of mineralized character.

While the lure is the same, the new camp differs greatly from the ghost cities of old. Principles of scientific mining will be applied in place of the arduous methods of the bygone era. The pack mule carrying food supplies to last for months is gone. In its stead are the modern automobile and truck. The tents are the one link

Driving on desert roads makes plenty of work for this enterprising gold field service man.

Scossa has with well nigh forgotten camps, for but few wooden buildings are erected as yet. But the automobile service station—a new phenomenon at a gold camp—has already appeared on the scene, set up its gasoline pump and its Mobiloil sign, and started a rushing business, with the patronage of so many motor cars.

Notwithstanding its size—it is about big enough to hold three

persons comfortably—the filling station already has a gas storage tank buried in the ground and facilities for lubricating automobiles by the most modern methods.

It is a strange contrast. While Scossa makes a new chapter in history, it is fabricating the dawn of a new era in mining, for none of its methods of mining or its modern facilities can link Scossa's citizens with the past.

## FIRST RED CROSS STAMP

In keeping with the policy of the Post Office Department, to place commemorative stamps on sale the first day in localities having historical relations to the event for which the stamp is provided, new Red Cross stamps, placed on sale May 21, the date of the anniversary, were allotted to the post offices in Washington, D. C., and Danville, N. Y. Washington was selected because the national headquarters of the Red Cross are located there, while Danville is the city in which the first chapter of the American Red Cross was organized.

The new bureau of agricultural en-

gineering, authorized by the last Congress, began its existence as a part of the United States Department of Agriculture on July 1. S. H. McCrory, who has been in the service of the department for a quarter of a century, heads the new bureau. Its work will deal principally with soil-erosion control, farm mechanical equipment and farm structures.

An admonition broadcast over the radio by the United States Public Health Service, to eat less meat during hot weather, brought many telegrams of protest to the Department of Agriculture from livestock associa-

tions, packers and others throughout the country, who consider their interests damaged by such advice.

### WIFE CAN'T HAVE BOTH

Vice Chancellor Buchanan in chancery court, Camden, ruled Monday that a wife may flirt with her husband or she may sue him for separation and alimony—but she can't do both and win.

Mrs. John R. Grimshaw, of Woodlynne, N. J., sued for separation but in giving testimony admitted that while she and her husband were separated they frequently took rides in the moonlight and spoke of love. Chancellor Buchanan denied the woman's plea.

Facts for Farm Folks

Written by Agricultural Authorities

SUMMER LIGHTS

By Prof. Paul G. Riley

The demand for August, September and October eggs of good size and quality is always greater than the supply.

The days are beginning to get short. The weather is hot, and it is difficult to keep total feed consumption of the laying flock at its height from now on until cool weather.

A great many poultrymen have discovered that the use of artificial light, beginning any time from August 1 to August 15, has been of real help in holding production.

Coming up State one day last week, continues Miss MacDonald, we saw a man with a load of loose apples in his wagon.

We raise the question: "Are there not ways in which these apples might be used both for ourselves and for others?"

We venture to say that, at this present time, there are in Delaware those who do not have enough to eat or, at least not as much fruit as they need for their best health and well-being.

In Philadelphia, the Relief Committee states that it still has several thousand families for which it has to provide a weekly food supply.

Delaware surely has some who could make use of surplus fruit. The question to solve is how to connect these people with the supply going to waste.

These early apples are delicious in flavor and can be used in a variety of ways. They do not have keeping qualities, but can easily be canned or dried for winter use.

1. Pare, quarter and core, wash, pack in jars, cover with boiling syrup, put on the rubber and cover lightly, sterilize by wash boiler method 15 minutes.

2. Cook quarters in syrup or bake in oven, and proceed as above, sterilizing 5 minutes.

3. Prepare apple sauce as for table, pack in jars, sterilizing 5 minutes. Do not strain apple sauce.

Fresh or canned apples may be used in many ways. The following are suggestions:

Apple Muffins—2 cups flour, 5 teaspoons baking powder, 1 teaspoon salt, 1 tablespoon sugar, 3/4 cup milk, 1 egg, 4 tablespoons melted fat.

Apple Ham Casserole—Rub a 1-inch thick slice of ham with brown sugar and place in baking dish. Stick 2 cloves in ham.

Apple Salad—Is very good (a) 2 large, tart apples, sliced combined with 1 cup celery cut in small pieces, and 2 slices of canned pineapple, cut in pieces.

Baked Apple Sauce—Pare, quarter, core apples. Put in deep pudding dish. Add water to about cover apples, sweeten slightly. Cover dish and bake until tender in a slow oven.

Apple Sauce Cake—1/2 cup butter, 1/2 cup sugar, 1-3 apple sauce as prepared for table, 1 1/2 teaspoon soda dissolved in sauce, 2 cups flour, 1 teaspoon cinnamon, 3/4 teaspoon each of cloves, nutmeg and allspice, 1/2 teaspoon salt, 1/2 cup chopped raisins, 1/2 cup nuts if desired.

Cream butter, add sugar gradually, then the apple sauce mixed with soda. Then stir in flour, spices and raisins floured. Bake in moderate oven.

Brown Betty—Cover the bottom of a greased baking dish with medium dry bread crumbs. Add a generous layer of thinly sliced or chopped tart apples. Sprinkle with sugar, a bit of spice and bits of butter. Repeat. Cover top with crumbs, add a little

increased production is not because it gives a longer working day, as the days are still fairly long, but it gets the birds up early in the morning, when the weather is cool. This seems to increase the total daily feed consumption.

If it is desirable to use these hens for breeders, the lights should be turned off not later than November 1, which, of course, will cause a complete moult in the entire group of hens. Or, if egg production is the only thing that is desired, the lights may be continued throughout the winter, gradually reducing the amount of light as the weather gets cool so that lights are going on at four o'clock in the morning.

A great many poultrymen have found that by using this practice they can maintain from thirty-five to sixty per cent production until well along in the winter and that this practice is profitable.

ROGER BABSON SAYS IT IS TIME TO ADVERTISE

If there was ever a time when the newspapers could perform a real service for the United States, it is today—furthermore this applies to all groups of people, bankers, manufacturers, merchants and wage earners. You need only to tell the people the simple truth. Statistics now indicate that business has seen its worst, even though the recovery will be slow.

Irrespective of what happens to the stock market in the next year, I am willing to stake my reputation, based on 30 years experience (1) that business has seen its worst; (2) that, although the change will be slow it will be in the right direction; and (3) that within a reasonable time this country will again enter a period of marked prosperity. In short, statistics today point to another period of prosperity, the same as they three years ago pointed to the present period of depression—as you go back home tell your merchants that now is the time to advertise.—Roger Babson, business economist, to members of Advertising Federation of America.

this neighborhood, recently spent a few days with Mrs. Walter Ellis Brown.

Mrs. Seruch T. Kimble and daughter, Georgianna, Mrs. Frank Herbert Zebly and Mrs. Davison went to Perry Point, Md., last Wednesday, with a group of ladies from Wilmington, to entertain the wounded soldiers in the army hospital there.

UPHOLD COURAGEOUS EDITORS

For many years Wisconsin has been known as a "Progressive" state, politically. Just what "Progressive" means is largely a matter of opinion. An incident occurred in the "Progressive" 1931 Wisconsin Legislature, which arouses public interest in the freedom of the press and personal rights and liberties.

John D. Chapple, managing editor of the Ashland, Wisconsin, Daily Press, criticized "Progressive" legislation for what he considered its attempt to prohibit opposition by private industries of Wisconsin to the program of state ownership of industry which the Legislature favored.

In an address before the Ashland Rotary Club and reprinted from the Ashland Tidings in copyright booklet form, he shows what Wisconsin legislators and legislative committees did to gag opposition to political attacks on private property, in his opinion.

As a result Mr. Chapple was requested to appear before the assembly judiciary committee to explain his editorial criticism of their program and his comment on certain individual members.

His report of the questions asked him and the determined fight made to deny him an opportunity to make his own statement in conclusion, remind one of gag rule of the most despotic character.

A Wisconsin political row is of no particular interest to the balance of the United States except as it develops policies which encroach upon fundamental American rights. Citizens in every state resent political attempts to curb or intimidate an editor for his comment about public officials or legislative bodies.

The greatest danger this nation faces today is the growing power of officialism. If gag rule of editorial comment was attempted in Wisconsin, as claimed by Editor Chapple, it should be criticized by every editor, regardless of his politics. The absolute freedom of the press is the greatest safe guard this nation has against arrogant officialism which can, if permitted to unrestrictedly expand its powers, crush personal liberty and individual initiative and enterprise in this nation.

Legislative and public servants should be rebuked when necessary and tax-payers should be held more strictly accountable to the taxpayers for their official acts in digging into the public treasuries in their endeavors to force states into business in competition with private citizens and taxpayers.

Editor Chapple is to be commended and should be upheld for his courage in expressing his objections to a political system in which he does not believe, in the face of the powerful opposition of the party in power. The people need this kind of courage to protect American traditions and ideals.

HIGHER GASOLINE PRICES HELPFUL

Gasoline price wars—which have been virulently fought in many states during recent months—are considered

RAT-SNAP

KILLS RATS

Also mice. Absolutely prevents odors from carcass. One package proves this. RAT-SNAP comes in cakes—no mixing with other food. Guaranteed.

3 1/2 size—1 cake—enough for Pantry, Kitchen or Cellar. 6 1/2 size—2 cakes—enough for Chicken House, coops, or small buildings. 1 1/2 size—5 cakes—enough for all farm and out-buildings, storage buildings, or factory buildings.

Sold and guaranteed by JACKSON'S HARDWARE STORE GEO. R. LEAK NEWARK, DEL.

by many motorists to be an unmixed blessing. Where once they were forced to pay 20 cents a gallon for fuel, they could buy it for ten cents—and if the oil industry took a loss in the process it was nothing to them.

But the San Francisco Chronicle points out that during the last "war," a broader view of the situation was developed. "The industry, one of the largest in California, is operating at a loss, which sooner or later will disastrously affect its thousands of employees," says the Chronicle. "The public will feel that in its pocket nerve."

Excursion to New York and return Sundays, Aug. 2, 16, 30. Tickets good in coaches on regular train No. 26, leaving Wilmington 5.46 A.M. Returning, leaves New York, Liberty Street, 6.45 P.M. same day.

Eastern Standard Time. Phone: Wilmington 8351-8352-27713. NEWARK 18. Baltimore & Ohio

ADVERTISEMENT FOR BIDS

Sealed proposals will be received by the State Highway Department, at its office, Dover, Del., until 2.00 o'clock p. m., Eastern Standard Time, August 19, 1931, and at that place and time publicly opened for contracts involving the following approximate quantities:

Contract No. 1 (N-4) Indian River Inlet Dredging 50,000 Cu. yds. Excavation

Contract 144 B Marshallton Cutoff: Paving 1500 Feet 800 Cu. yds. Excavation 850 Cu. yds. Cement Concrete Pavement 500 Lin. ft. Expansion Joint 2,500 Sq. ft. Concrete Sidewalk 400 Lin. ft. Concrete Curb 1,700 Lin. ft. Cable Guard Rail 10 End Post Attachments 2,000 Lin. ft. Wood Shoulder Curb

Contract 182 B Appoquinimink and Drawers Creek Bridges 200 Cu. yds. Excavation 500 Cu. yds. Borrow 1,400 Cu. yds. Class A Concrete 122,000 Lbs. Reinforcement 7,000 Lin. ft. B.M. Sheet Piling 10 M ft. B.M. Sheet Piling

NOTE: In order that the Department may secure bids only from those contractors who are thoroughly experienced in this class of work, applicants for proposals and plans on Contract 182B will be required to submit sworn statements as to their experience, mechanical equipment and financial resources before the proposal and plans are forwarded. These statements must be on the standard forms of the Department which may be obtained upon request.

Contract 199 Dorman Street, Harrington 3450 Ft. 1,500 Cu. yds. Excavation 1,250 Cu. yds. Cement Concrete Pavement 3,650 Lin. ft. Longitudinal Joint 800 Lin. ft. Expansion Joint 1,000 Lbs. Catch Basin Castings 100 Lin. ft. 12 in. C. I. Pipe 400 Lin. ft. Concrete Curb

Contract 200 William and Cedar Streets, Bridgeville 2600 Ft. 800 Cu. yds. Excavation 400 Cu. yds. Borrow 1,000 Cu. yds. Cement Concrete Pavement 2,600 Lin. ft. Longitudinal Joint 700 Lin. ft. Expansion Joint 10 Cu. yds. Class A Concrete 2,000 Lbs. Catch Basin Castings 150 Lin. ft. 12 in. C. I. P.

Contract 202 School Street, Millsboro 1340 Ft. 600 Cu. yds. Excavation 500 Cu. yds. Cement Concrete Pavement 1,350 Lin. ft. Longitudinal Joint 400 Lin. ft. Expansion Joint 800 Lbs. Catch Basin Castings 50 Lin. ft. 12 in. C. I. Pipe

Contract U 30 Tons Fertilizer 1 Ton Assorted Seed

Performance of contract shall commence within ten (10) days after execution of the contract and be completed as specified. In the employment of labor, preference shall be given to residents of the State of Delaware. Monthly payments will be made for 90 per cent of the construction completed each month. Bidders must submit proposals upon forms provided by the Department. Each proposal must be accompanied by a surety bond, certified check, or money to the amount of at least ten (10) per centum of the total amount of the proposal.

The envelope containing the proposal must be marked "Proposal for the construction of State Highway Contract No. ...." The Contract will be awarded or rejected within twenty (20) days from the date of opening proposals. The right is reserved to reject any or all bids. Complete sets of plans and specifications may be obtained upon receipt of two dollars (\$2.00) for each contract, which amount will not be refunded. STATE HIGHWAY DEPARTMENT Dover, Delaware 7.23.31

"The Government is losing large sums of money in taxes. The other taxpayers—which means everyone—will have to make up the difference." What is true in California, is likewise true in many other states. At a time when industrial rehabilitation and stimulated employment are the burning issues of the day, a losing business is bad for all of us and return to normal gasoline prices should be welcomed as a sign of better business and employment conditions.

FOR RENT—Second floor front room. Call Sheaffer Paint Shop 7.30.11. Main Street.

FOR RENT—Beginning August 25, No. 166 W. Main street, now occupied by Walter Geist. Good location. Hot water heat. 7.10.31. EDWARD W. COOCH.

FOR RENT—One apartment, three rooms and private bath, on second floor. MRS. F. E. STRICKLAND, 88 Park Place. 6.25.11

FOR RENT—Three garages, \$2 per month. Located at 178 South Chapel St. Apply FIORE NARDO. 5.21.11.

FOR SALE—An upright piano, in good condition. Price \$25.00. 7.30.31. Phone 28-J.

FOR SALE—Police Dog, male, eight months old. 100 S. College Avenue. Telephone 61-J.

FOR SALE—Good Williams Red Apples. 2 1/2 bushels per basket. No deliveries. Baskets to be returned. 7.30.31. 57 Park Place.

## SUMMER ROUND-UP OF CHILDREN STILL ON

Dr. J. R. Downes Ready to Answer All Calls

The "Summer Round-up of the Children" now being carried on in the three counties will continue as long as there is sufficient demand for it, according to the plans of Dr. A. C. Jost, Executive Secretary of the State Board of Health. Unfortunately all children entitled to the service, which has for its purpose the discovery and correction of physical defects in the pre-school child, have not been able to take advantage of the opportunity offered by the State Board of Health at the request of the State Parent-Teacher Association. In some instances families are away from home; in others parents have perhaps been indifferent or unable to co-operate for economic reasons.

The New Castle county unit in charge of Dr. J. R. Downes is ready to answer all calls regardless of whether application was made earlier in the season. Sixty-six defects were discovered in the first sixty-eight children examined in this county.

Diseased tonsils and adenoids head the list, with defective teeth second. In these sixty-eight children only three cases of defective eyes and only one case of malnutrition were found.

Dr. E. F. Smith, assisted by Miss T. B. Hastings, has already held clinics at more than half of the schools which have requested the service in Kent county. Dr. Smith, in a recent interview cited the examination at Harrington as typical. Of twenty-one children examined there only one was found perfect, i. e., had no physical defect. Fifteen children needed immediate attention because of defective teeth or tonsils or malnutrition. The other six had minor defects.

Dr. Everett Reynolds has added an important feature to the "Summer Round-up" in Sussex county by starting diphtheria immunization at the time of the examination.

Parents whose children have not yet been examined may get information from the State Board of Health or from local State officers of the Parent-Teacher Association.

## MARGARET E. STEWART DROWNS AT HOLLOWAY BEACH, CHARLESTOWN

Canoeing With Uncle When It Overturned About Two Hundred Feet From Shore

Margaret E. Stewart, daughter of Mr. and Mrs. John M. Stewart, of 913 Vandever avenue, Wilmington, was drowned at Holloway Beach, Charlestown, at 6:45 o'clock Sunday evening, when the canoe in which she was boating with her uncle and aunt, Mr. and Mrs. John S. Applegate, of 14 East Forty-fourth street, Wilmington, upset.

Two other canoes, one operated by Joseph Appleton, another uncle with whom was his child and a sister of the drowned girl, and another occupied by James Davis, another uncle of the drowned girl, were close by.

The canoes were close together. Appleton was in one end of his canoe, his wife in the front and the child in the center. Suddenly the canoe overturned when about 200 feet from the shore. All were thrown into the water and Appleton's wife and the girl who was drowned grabbed him about the neck as he grasped the overturned canoe. The sudden shock loosened Appleton's hold on the canoe and all three sank.

As she came to the surface, Appleton grasped the overturned canoe but the child did not come to the surface. Thirty or forty persons joined in a search for the body of the girl and it was found in about twenty minutes.

Dr. George W. Vaughan, of Wilmington, who was at the beach, at once began an effort to resuscitate the child and the North East Fire Company was summoned with its pulmotor. The pulmotor was used but did not appear to bring results and the child was taken to the Union Hospital at Elkton where further efforts were made to resuscitate her but failed. Coroner Frazier was notified and gave a certificate of accidental death and the body was removed to the home of the parents.

One of the largest crowds of the season was at the beach and watched the efforts to recover the body of the child and to resuscitate her after the body was recovered. The parents of the child were soon on the scene and watched the efforts to save their child. They were nearly prostrated from the shock. The entire family, including the three uncles and aunts, had gone to the beach for a Sunday outing.

### Woman Saved by Boat

A motor boat rushed to the aid of the party and grasped Mrs. Appleton

### Expert Tells How To Make Compost

Home Gardeners Should Start Now to Prepare Humus Heap From Refuse

The amateur gardener who finds it difficult to obtain enough humus-making materials to use in fertilizing his garden should begin in July to start making a compost heap of weeds, plant trimmings, lawn grasses and other available vegetable material. The only precaution he needs to take in making such a compost heap is to avoid including in it any diseased plant material or weeds that have gone to seed.

The making of compost is of especial interest now because much has been written of late on the subject of artificial manures for the home garden. We already know that by adding certain fertilizers to a compost pile that is kept moist, the decay of composting material is hastened.

Investigations of various agricultural experiment stations have shown that from forty to fifty pounds of a highly nitrogenous fertilizer, plus lime, should be added to about a ton of plant refuse. On this basis, the home gardener should use about two pounds of a fertilizing material such as ammonium sulphate to about 100 pounds of weeds, grass and other available plant refuse. The addition of a nitrogenous fertilizer to the compost heap provides food for the bacteria that bring about the decomposition of plant material.

The gardener who follows these directions in hastening the decomposition of his compost pile will have artificial homemade manure available for fall or early use. The pile should be made in an out-of-the-way place but where water is easily accessible.

### REVIVING SILVER

The mining problem has become of international importance. The decline in the value of silver coinage is a prime reason for the continuance of unsatisfactory world eco-

nomie conditions. Country after country has gone to the gold standard, though there is not enough of the precious metal to carry on the commerce of the world. Only a revival of silver can offset the situation.

The efforts now being made, in many nations, to effect such a revival are worthy of the support of all peoples, all governments.

### Butter Consumption Increases With Lower Prices, Says Bureau

An increase in the consumption of butter, particularly in European countries, following the low general level of prices is reported by the Bureau of Agricultural Economics, U. S. Department of Agriculture, in its July summary of world dairy prospects. This increase is noted particularly in Great Britain where the consumption of imported butter for the present year, from January to June 15, was about 19 per cent more than for the corresponding period of 1930. Imports of butter in Great Britain were 10.3 per cent heavier during the first five months of this year than for the same period last year. Butter prices in important foreign markets have also tended somewhat higher in recent weeks. In Germany, however, the demand for foreign butter has declined, imports decreasing along with falling prices.

Domestic dairy production is showing much more than the normal seasonal decline and butter prices are tending slightly higher. Danish butter production has passed its peak, but continues heavy. Australia is finishing a year of record exportation of butter, the quantity exceeding any previous year on record. The foreign trade of the United States in dairy products continues stable although the total volume is the lightest in recent years.

### Debt Payments

This table, prepared by the Alexander Hamilton Institute, shows the average annual payments to be made from 1929 to 1965 by Germany to the allied countries, and those to be made by debtor nations to the United States:

	Payments by Germany	Payments to United States
France	\$249,300,000	\$108,400,000
England	97,400,000	177,800,000
Italy	50,900,000	26,500,000
Belgium	27,500,000	11,700,000
Jugoslavia	20,000,000	1,100,000
Germany		15,700,000
Rumania	4,800,000	1,900,000
Portugal	3,100,000	
Japan	3,100,000	
Greece	1,700,000	300,000
Poland	120,000	6,900,000
Total	\$475,700,000	\$349,800,000

### Cure for Poison Ivy Infection

"If an outdoor fan is unfortunate enough to acquire a 'case' of poison ivy this Summer he'll be better off if he does not listen to his friends and try all their home-made, 'sure-cure' remedies," advises the Isaac Walton League in a recent vacation bulletin.

"There is no reason to fool with trick cures when a definite relief and cure for poison ivy is available. Here is the way to treat a case of this vegetable poison. The method is the result of hundreds of experiments conducted by a well known scientist, J. B. McNair, formerly connected with the University of Chicago, and now on the staff of the Field Museum.

"First, infected parts should be washed with strong soap and water. Laundry soap is better than a plain hand soap. The idea is to remove from the skin as much of the irritating oil

of the poison ivy plant as possible. Soap and water will do very well, but washing the infected parts with ether or chloroform is recommended because the oil of poison ivy is easily soluble in these.

"Next, apply a 5 per cent solution of ferric chloride which has been added to a fifty-fifty solution of water and alcohol. If you can't get the alcohol use the diluted ferric chloride solution. Swab the infected parts thoroughly with cotton soaked in the chloride, and then apply compresses of the solution to the infected skin. Keep the pads moist and well bandaged. Renew the chloride solution at intervals.

"Ferric chloride or iron chloride can be purchased at most any drug store. Outdoor fans who wish to play safe can take a bottle of it with them on their trip."

### Delaware Game and Fish Commission

Bulletin No. 2

The Game and Fish Laws with revisions made by the last session of the State Legislature, have been printed and are ready for distribution. Copies may be obtained from any game warden or from the Commission, at Dover. Sometimes State and Federal game laws seem to conflict. Frequently one set of laws will declare an open season on a certain bird or animal, and the other set of laws closes the season. Whenever a condition like this exists, the closed season prevails. There are, of course, some laws in this book which do not meet with the approval of everyone, but nevertheless, until revised, they must and will be enforced. In connection with the enforcement of these laws, the following game wardens are serving:

For New Castle County—Louis Eckrich, 834 Pine street, Wilmington; Wm. Wideman, Newark; John H. Fisher, Middletown.

For Kent County—E. J. Boggs, Cheswold; James H. Hudson, Milford.

For Sussex County—Joseph Watson, Milford; Wm. P. Short, Bridgeville; Alfred Megee, Jr., Rehoboth; Wm. Louis Nelson, Delmar.

These game wardens are under the immediate direction of Asst. Chief Warden Clifford E. Burton, of Angola.

Laws that cannot be enforced without discrimination cannot be effective and cannot command respect. It is the aim of the game wardens to prevent violations rather than to arrest violators.

During June one thousand and thirty-five pheasant eggs were distributed to boys and girls throughout this State for hatching. The result is being eagerly watched and we are all pulling for a successful brood of pheasants. Complaints have been heard that pheasants kill other game. The following item taken from the Pennsylvania Game News, regarding conditions on the Pennsylvania Game Farms where so far over 50,000 pheasant eggs have been produced, may be of interest.

"Contrary to the belief that ring-necked kill young rabbits, game officials observed hundreds of rabbits, varying in size from six inches to adults in all the fields at the State Game Farms. On no occasion have the game superintendents or any of their helpers seen pheasants molesting the young rabbits, some of which even enter the pheasant coops."

There are a number of waste places throughout the State which could be turned into fish ponds with very little expense. Also in this day of high or over production the same thing could be done with some regular farm land and perhaps be of more value than if used for agricultural purposes. The construction of a pond is not difficult but the location should be carefully studied. While spring water is the most desirable it may also be secured from a creek, just so it is pure and of sufficient volume to maintain the water level. The land should slope

sufficiently so that the lower end of the pond will carry at least three feet of water, more is preferable. Shallow portions of the pond provide an opportunity for small fish which will not be disturbed there by large fish.

A pond would not only provide fish as a food for the farmer but also the sport of fishing. Also if located within a reasonable distance of any buildings, it would also provide a source of water in case of fire, a place from which to procure ice, and would tend to hold back water in the surrounding ground which in turn would hold back neighboring springs and lessen the danger of water shortage during a drought. A pond on any farm would also add to the beauty of the country. Anyone interested in the construction of such a pond may secure additional information on application to this Commission.

A number of experiments made by the Michigan Conservation Department has shown that only 2 1/2 per cent of young fish caught with flies and only 10 per cent of those caught with barbed hooks die when returned to the water. Therefore, when a small fish is caught don't let it lie on the bank or in the boat and say "it will only die anyhow," but return it carefully to the water. To do this, before taking hold of the fish, wet the hands. A fish is covered with a slimy substance that protects the scales, and breaking this (which is done when the fish is handled with dry hands) destroys the protective coat, while wetting the hands allows the substance to slip through without breaking. When this protection coating is broken a fungus growth at-

tacks the fish and sooner or later causes death.

One in favor of the starlings—An investigation in Southeastern Pennsylvania shows that starlings are consuming a great many Japanese beetle grubs or larvae, as many as fourteen being found in the stomach of one starling.

### Invents New Process

T. M. RECTOR, chemical engineer of General Foods Corporation, has been credited with the invention of the new vita-fresh process of packing coffee in an almost perfect vacuum. By excluding air from the can, the new process keeps coffee fresh for many months. The vita-fresh method has been termed "the most important advance in years in the coffee industry." Rector's home is in Rutherford, N. J.

### Gladiolus Does Best If Freely Fertilized

Expert Gives Practical Advice on Material and Method

In order to reach the highest degree of perfection in bloom the gladiolus must be liberally fertilized. The home gardener can do this best by applying a well-balanced commercial fertilizer. One containing 5 per cent nitrogen, 8 per cent phosphoric acid and 5 per cent potash—commonly known as "a 5-8-5"—is recommended.

Practical experience dictates that this fertilizer can be applied to best advantage during two stages of the development of the plants. Make the first application just as or shortly after the tips of the shoots appear through the ground, using five to six pounds to every 100 feet of row. Apply the fertilizer as evenly as possible in a ribbon extending five or six inches on each side of the row, and then rake or cultivate it into the soil. Do not apply when the plants are wet.

Make the second and last application when the plants begin to bloom. This is an aid to corn development, because the fertilizer stimulates continued growth of the plant and causes it to store more food material in the corm for next year's bloom. Use four or five pounds of the "5-8-5" to each 100 feet of row, putting it on the soil as recommended for the early season application. Cultivate throughout the season at weekly intervals.

### TOMMY LOUGHRAN STILL BOASTING

Believing a "big" ring battle is near for him, Tommy Loughran, Philadelphia heavyweight champion, has re-opened his training camp here. He started light training and expects to be matched with Jack Sharkey for a battle in August.

"With only a few days training," he said, "and I can be any heavyweight in the world." His manager, Joe Smith, is attempting to negotiate a contract

Poorly fed plants, marked by light green or yellowish leaves usually produce short spikes and inferior bloom. Rich, deep green, vigorous foliage is an index of well-grown plants, ones that invariably produce the kind of spikes upon which ribbons are attached at garden shows.

### TREAT IT GENTLY

Legislators should treat the life insurance industry gently in matters of taxation and legislation. No industry does more for the welfare of the public. Life insurance is a great protector that guards the children and dependents against want. It is an investment that reflects the faith of millions of citizens. It is, in the fullest sense of the word, a trust whose permanence and ability must always be beyond question. In many cases, money is loaned to the insured when he is unable to get aid from any other source.

The investments of life insurance companies in industrial securities, a tremendous contribution to development and employment. These sums which are put to work are reflected in the life and prosperity of every citizen—whether or not he is the possessor of a policy. Life insurance is one of the foundations upon which modern civilization is being built.

To give the industry the fairest legislative and tax treatment is only good business—it is vital to personal and business life of the nation.
